UNIT 6 · STANDARD 6.NOS.1

Division Expressions with Fractions and Mixed Numbers

Lesson 6-2 · Teacher Copy

Name: Type your name **Date:** Today's date **Class:** Class period

My Notes Level 2 Standard

🎯 **TODAY'S OBJECTIVES**

Content Objective: I can divide a fraction by a fraction and divide with mixed numbers by multiplying by the reciprocal.
Language Objective: I can explain the steps using the words reciprocal, improper fraction, mixed number, and simplify.

📖 See **Learn It** for the explanation and worked examples, and the **Vocab** tab for the words. These are your notes to fill in and keep.

✏️ **Fill in each blank as we go. Use the Word Bank to help you.**

📚 **WORD BANK — FILL EACH BLANK WITH THE BEST WORD**

Divide Fractions | Dividend | Divisor | Reciprocal | Quotient | Simplify | Mixed number | Improper fraction

👆 *Tap any word to see what it means and a picture.*

1. Keep the first fraction, change ÷ to ×, and flip the ________.
2. In 3/4 ÷ 1/2, the fraction 3/4 being divided is the ________.
3. In 3/4 ÷ 1/2, the fraction 1/2 we divide by is the ________.
4. To divide by 1/2, I multiply by its ________, which is 2.
5. The answer to a division problem is the ________.
6. Writing a fraction with smaller numbers that names the same amount, like 4/8 = 1/2, is to ________ it.

7 A whole number and a fraction written together is a

__________ __________.

8 A fraction whose numerator is at least its denominator is an

__________ __________.

Write About the Math

How does dividing fractions help the carpenter?
¿Cómo ayuda dividir fracciones a la carpintera?

Say your answer to a partner first. Then write it, using at least two of these words:

- ☐ **Divide Fractions** — *Dividir fracciones*
- ☐ **Dividend** — *Dividendo*
- ☐ **Divisor** — *Divisor*
- ☐ **Reciprocal** — *Recíproco*
- ☐ **Quotient** — *Cociente*

Model: *She will get many portions because 1/8 pound is much smaller than 3/4 pound.* — Students recognize the divisor 1/8 is smaller than the dividend 3/4, so the quotient is greater than 1.

Start

Complete the frames. Use the word bank.
Completa las oraciones. Usa el banco de palabras.

- **The carpenter can cut ____ pieces because 5/6 ÷ 1/12 = ____.**
- **My answer is ____ because ____.**
  Mi respuesta es ____ porque ____.

Build

Write two connected sentences. Use because, so, or but.
Escribe dos oraciones conectadas. Usa porque, entonces o pero.

- **My claim is ____.**
  Mi afirmación es ____.
- **My evidence is ____, so ____.**
  Mi evidencia es ____, entonces ____.

Explain

Write a claim, give math evidence, and explain your reasoning.

Escribe una afirmación, da evidencia matemática y explica tu razonamiento.

- [ ] I answered the question.
- [ ] I used math evidence: numbers, an equation, or a model.
- [ ] I used at least two math words.

Writing Guide — Teacher Copy

- The answer to the math question is correct.
- The evidence is real lesson mathematics (numbers, equation, or model), not restated claim.
- The support level changed the language scaffolding, never the mathematical expectation.

Answer Key & Teacher Guide

1. **Notes 1:** Divide Fractions
2. **Notes 2:** Dividend
3. **Notes 3:** Divisor
4. **Notes 4:** Reciprocal
5. **Notes 5:** Quotient
6. **Notes 6:** Simplify
7. **Notes 7:** Mixed number
8. **Notes 8:** Improper fraction
9. **Watch for this mistake:** *A common mistake in Divide Fractions is flipping the wrong fraction: students flip the dividend (the first fraction) instead of the divisor (the second fraction). For example, solving 3/4 ÷ 5/8 by flipping 3/4 to 4/3 and keeping 5/8 gives 4/3 × 5/8 = 20/24 = 5/6 — but only the divisor gets flipped. Keep 3/4, change ÷ to ×, and flip only the divisor 5/8 to its reciprocal 8/5: 3/4 × 8/5 = 24/20 = 6/5. Before you submit, check that the fraction you kept (the dividend) is still facing the same way it started.*
10. **Try It 1:** A. 4 — *(2/3) ÷ (1/6) = (2/3) × (6/1) = 12/3 = 4. The dial unlocks at 4.*
11. **Try It 2:** A. 3/2 — *(3/4) ÷ (1/2) = (3/4) × (2/1) = 6/4 = 3/2. The keypad accepts 3/2.*
