UNIT 2 · STANDARD 6.NOS.1

Interpret Division of Fractions

Lesson 2-1 · Teacher Copy

Name: Type your name **Date:** Today's date **Class:** Class period

My Notes Level 3 Enrichment

🎯 **TODAY'S OBJECTIVES**

Content Objective: I can use models to interpret what it means to divide by a fraction.
Language Objective: I can explain a fraction division using the words dividend, divisor, quotient, reciprocal, and unit fraction.

📖 See **Learn It** for the explanation and worked examples, and the **Vocab** tab for the words. These are your notes to fill in and keep.

✏️ **Fill in each blank as we go. Use the Word Bank to help you.**

📚 **WORD BANK — FILL EACH BLANK WITH THE BEST WORD**

Dividend | Divisor | Quotient | Reciprocal | Unit fraction

👆 *Tap any word to see what it means and a picture.*

Level 3: try the blanks from memory first, then check the bank.

1. In 6 ÷ 1/2, the number 6 being divided is the ________.
2. In 6 ÷ 1/2, the number 1/2 we divide by is the ________.
3. The answer to a division problem is the ________.
4. The fraction you get by flipping the numerator and denominator is the ________.
5. A fraction with a numerator of 1, like 1/5, is a ________.

Reflect — Exit Ticket

What does 5 ÷ 1/4 mean, and what is the quotient?

A. How many 1/4-size pieces fit into 5; quotient is 20

B. 5 groups of 1/4; quotient is 5/4

C. 1/4 of 5; quotient is 5/4

D. 5 minus 1/4; quotient is 4 3/4

Your answer:

Answer Key & Teacher Guide

1. **Notes 1:** Dividend
2. **Notes 2:** Divisor
3. **Notes 3:** Quotient
4. **Notes 4:** Reciprocal
5. **Notes 5:** Unit fraction
6. **Watch for this mistake:** *A common mistake in Interpret Division of Fractions is skipping the key idea: "Dividing by a fraction smaller than 1 gives an answer BIGGER than what you started with, because many tiny pieces fit inside." — always check your work against this rule before you submit.*
7. **Try It 1:** A. How many 1/3-foot pieces fit into 8 feet — *Dividing by 1/3 asks how many 1/3-foot pieces fit into 8 feet. Each foot holds 3 thirds, so 8 × 3 = 24 pieces.*
8. **Try It 2:** A. 5 ÷ 1/6 = 30 slivers — *How many 1/6-inch slivers fit into 5 inches? Each inch holds 6 sixths, so 5 × 6 = 30 slivers.*
9. **Exit Ticket:** A. How many 1/4-size pieces fit into 5; quotient is 20 — *5 ÷ 1/4 means 'how many 1/4-size pieces fit into 5.' Since each whole has 4 fourths, 5 × 4 = 20.*
