UNIT 6 · STANDARD 6.AT.7

Identify Equivalent Algebraic Expressions

Lesson 6-6

Name: Type your name **Date:** Today's date **Class:** Class period

My Notes
Level 3 Enrichment

🎯 **TODAY'S OBJECTIVES**

Content Objective: I can show that two expressions are equivalent by simplifying and combining like terms.
Language Objective: I can explain my work using the words equivalent, simplify, like terms, and combine.

📖 See **Learn It** for the explanation and worked examples, and the **Vocab** tab for the words. These are your notes to fill in and keep.

✏️ **Fill in each blank as we go. Use the Word Bank to help you.**

📚 **WORD BANK — FILL EACH BLANK WITH THE BEST WORD**

Equivalent Expressions | Equivalent | Simplify | Like Terms | Combine | Coefficient

👆 *Tap any word to see its meaning and a picture.*

Level 3: try the blanks from memory first, then check the bank.

1. Expressions with the same value for ______ allowed number are equivalent.

2. Expressions that always have the same value are ______.

3. Rewriting an expression in a shorter form that is still equal to it is to ______ it.

4. Terms with the same variable raised to the same power, like 4x and 9x, are ______.

5. To add or subtract like terms into one term is to ______ them.

6. A number multiplied by a variable is a ______ .

Write About the Math

Are these expressions equivalent? How can you prove it?
¿Estas expresiones son equivalentes? ¿Cómo lo puedes probar?

Say your answer to a partner first. Then write it, using at least two of these words:

- ☐ **Equivalent Expressions** *Expresiones equivalentes*
- ☐ **Equivalent** *Equivalente*
- ☐ **Simplify** *Simplificar*
- ☐ **Like Terms** *Términos semejantes*
- ☐ **Combine** *Combinar*

Model: *3x + 2x combines to 5x, so the two forms are equivalent.* — Students explain 3x + 2x = 5x (combining like terms), so both equal 5x + 10, and verify by substituting a value like x = 4 to get 30 both ways.

Start

Complete the frames. Use the word bank.

Completa las oraciones. Usa el banco de palabras.

- **The expressions ____ equivalent because when I simplify 4h + 2h + 30, I get ____. I can prove it by substituting h = ____: both expressions equal ____.**
- **My answer is ____ because ____.**
  Mi respuesta es ____ porque ____.

Build

Write two connected sentences. Use because, so, or but.

Escribe dos oraciones conectadas. Usa porque, entonces o pero.

- **My claim is ____.**
  Mi afirmación es ____.
- **My evidence is ____, so ____.**
  Mi evidencia es ____, entonces ____.

Explain

Write a claim, give math evidence, and explain your reasoning.

Escribe una afirmación, da evidencia matemática y explica tu razonamiento.

- [ ] I answered the question.
- [ ] I used math evidence: numbers, an equation, or a model.
- [ ] I used at least two math words.
