UNIT 5 · STANDARD 6.GR.1

Apply Area Concepts to Solve Problems

Lesson 5-4 · Teacher Copy

Name: Type your name **Date:** Today's date **Class:** Class period

My Notes Level 1 Support

🎯 **TODAY'S OBJECTIVES**

Content Objective: I can find the area of a composite figure by decomposing it into basic shapes, including a regular polygon split into triangles, and adding or subtracting the areas.
Language Objective: I can explain my steps using the words composite figure, decompose, add, and subtract.

📖 See **Learn It** for the explanation and worked examples, and the **Vocab** tab for the words. These are your notes to fill in and keep.

✏️ **Fill in each blank as we go. Use the Word Bank to help you.**

📚 **WORD BANK — FILL EACH BLANK WITH THE BEST WORD**

Composite Figure | **Decompose** | **Add** | **Subtract** | **Formula**

👆 *Tap any word to see its meaning and a picture.*

1. A shape made of two or more basic shapes combined is a ________.

2. To break a composite figure into basic shapes is to ________ it.

3. To find the total area of separate parts, I ________ their areas.

4. To find the area of a shape with a piece removed, I ________ the missing part's area.

5. A math rule written with symbols is a ________.

Write About the Math

How much will the carpet cost?

¿Cuánto costará la alfombra?

Say your answer to a partner first. Then write it, using at least two of these words:

- [ ] **Composite Figure** *Figura compuesta*
- [ ] **Decompose** *Descomponer*
- [ ] **Add** *Sumar*
- [ ] **Subtract** *Restar*
- [ ] **Formula** *Fórmula*

Model: *We decompose the L-shape because we already know how to find a rectangle's area.* — Students explain that the L-shape is hard to measure directly, so breaking it into two rectangles lets them use A = l x w on each piece and add the results.

Start

Complete the frames. Use the word bank.

Completa las oraciones. Usa el banco de palabras.

- **The top area is ____ sq ft and the stem area is ____ sq ft. Total = ____ + ____ = ____ sq ft. Cost = ____ x $5 = $____.**
- **My answer is ____ because ____.**

  Mi respuesta es ____ porque ____.

Build

Write two connected sentences. Use because, so, or but.

Escribe dos oraciones conectadas. Usa porque, entonces o pero.

- **My claim is ____.**

  Mi afirmación es ____.
- **My evidence is ____, so ____.**

  Mi evidencia es ____, entonces ____.

Explain

Write a claim, give math evidence, and explain your reasoning.

Escribe una afirmación, da evidencia matemática y explica tu razonamiento.

- [ ] I answered the question.
- [ ] I used math evidence: numbers, an equation, or a model.
- [ ] I used at least two math words.

Writing Guide — Teacher Copy

- The answer to the math question is correct.
- The evidence is real lesson mathematics (numbers, equation, or model), not restated claim.
- The support level changed the language scaffolding, never the mathematical expectation.

Answer Key & Teacher Guide

1. **Notes 1:** Composite Figure
2. **Notes 2:** Decompose
3. **Notes 3:** Add
4. **Notes 4:** Subtract
5. **Notes 5:** Formula
6. **Watch for this mistake:** *A common mistake in Area of Composite Figures is adding every piece even when a piece has been cut out of the figure. For a 10 ft by 8 ft rectangle with a 3 ft by 2 ft rectangular notch cut from one corner, students compute the full rectangle 10 × 8 = 80 sq ft and stop, or they add the notch instead of removing it (80 + 6 = 86 sq ft) instead of subtracting it: 80 − (3 × 2) = 80 − 6 = 74 sq ft. Before submitting, check whether each piece is part of the figure (add it) or missing from the figure (subtract it).*
7. **Try It 1:** D. 75 sq ft — *First rectangle = 9 x 6 = 54 sq ft. Second rectangle = 7 x 3 = 21 sq ft. Joined L-shape, so add: 54 + 21 = 75 sq ft.*
8. **Try It 2:** B. 172 sq ft — *Large rectangle = 16 x 12 = 192 sq ft. Cutout closet = 5 x 4 = 20 sq ft. A piece is removed, so subtract: 192 - 20 = 172 sq ft.*
