UNIT 4 · STANDARD 6.AT.4

Relate Fractions, Decimals, and Percents

Lesson 4-2 · Teacher Copy

Name: Type your name **Date:** Today's date **Class:** Class period

My Notes Level 2 Standard

🎯 **TODAY'S OBJECTIVES**

Content Objective: I can write equivalent fractions, decimals, and percents for the same value.
Language Objective: I can explain my conversions using the words percent, decimal, equivalent, and benchmark.

📖 See **Learn It** for the explanation and worked examples, and the **Vocab** tab for the words. These are your notes to fill in and keep.

✏️ **Fill in each blank as we go. Use the Word Bank to help you.**

📚 **WORD BANK — FILL EACH BLANK WITH THE BEST WORD**

Percent **Decimal** **Equivalent** **Benchmark** **Discount**

👆 *Tap any word to see what it means and a picture.*

1. A ratio that compares a number to 100, written with a % sign, is a ____________.

2. A number that uses a point to show parts of a whole is a ____________.

3. ____________ — Having the same value, just written a different way.

4. A common, easy-to-remember value like 50% or 1/4 used for comparing is a ____________.

5. An amount taken off a price, often given as a percent, is a ____________.

Write About the Math

Guided ESOL writing

Use the support level you need. Every level answers the same math question.

1. Understand the Question

EXPLAIN

How did you convert a fraction like 3/5 into a decimal and a percent in the table?

Your job: Answer the question. Use math evidence. Explain how the evidence proves your answer.

Responde la pregunta. Usa evidencia matemática. Explica cómo la evidencia demuestra tu respuesta.

2. Plan Your Math Words

Check at least two words you will use.

- ☐ **Percent** — A way to compare a number to 100, shown with the % sign.
  Porcentaje — Una manera de comparar un número con 100, con el signo %.
- ☐ **Decimal** — A number with a dot, like 0.5, that shows a part.
  Decimal — Un número con un punto, como 0.5, que muestra una parte.
- ☐ **Equivalent** — Having the same value, just written a different way.
  Equivalente — Tener el mismo valor, escrito de otra forma.
- ☐ **Benchmark** — A familiar number you use to guess, like 50% or 1/2.
  Referencia — Un número conocido que usas para estimar, como 50% o 1/2.
- ☐ **Discount** — Money taken off the first price to make it cheaper.
  Descuento — Dinero que se quita del precio original para que sea más barato.

Say it first: Say your idea to a partner or quietly to yourself before you write.

Di tu idea a un compañero o en voz baja antes de escribir.

To change ____ to a decimal I divided ____ by ____.

Para cambiar ____ a decimal dividí ____ entre ____.

3. Build Your Explanation

Model the parts: This model shows the parts of an explanation. It does not answer your writing question.

Claim: 3/4, 0.75, and 75% all name the same score.

Evidence: Students give 3/4 = 0.75 = 75% and recognize these are three forms of one value, not three different scores.

Reasoning: This evidence connects the definition of percent to the mathematical claim.

Start

Most language support

Complete the frames. Use the word bank.

Completa las oraciones. Usa el banco de palabras.

- **To change ____ to a decimal I divided ____ by ____.**
  Para cambiar ____ a decimal dividí ____ entre ____.
- **To get the percent I multiplied the decimal by ____.**
  Para obtener el porcentaje multipliqué el decimal por ____.

Build

Some language support

Write two connected sentences. Use because, so, or but.

Escribe dos oraciones conectadas. Usa porque, entonces o pero.

- **My claim is ____.**
  Mi afirmación es ____.
- **I know because ____.**
  Lo sé porque ____.
- **So ____.**
  Entonces ____.

Explain

Light language support

Write a claim, give math evidence, and explain your reasoning.

Escribe una afirmación, da evidencia matemática y explica tu razonamiento.

- **My claim is ____.**
  Mi afirmación es ____.
- **My math evidence is ____.**
  Mi evidencia matemática es ____.
- **This proves ____ because ____.**
  Esto demuestra ____ porque ____.

4. Check Your Explanation

- [ ] I answered the question.
  Respondí la pregunta.
- [ ] I used math evidence: numbers, an equation, a model, or a comparison.
  Usé evidencia matemática: números, una ecuación, un modelo o una comparación.
- [ ] I explained how the evidence proves my answer.
  Expliqué cómo la evidencia demuestra mi respuesta.
- [ ] I used at least two math words.
  Usé por lo menos dos palabras matemáticas.
- [ ] I reread complete sentences and punctuation.
  Volví a leer mis oraciones completas y la puntuación.

Writing Guide — Teacher Copy

The support level changes the amount of language scaffolding, not the mathematical expectation. Look for the same five features in every response.

- I answered the question.
- I used math evidence: numbers, an equation, a model, or a comparison.
- I explained how the evidence proves my answer.
- I used at least two math words.
- I reread complete sentences and punctuation.

Answer Key & Teacher Guide

1. **Notes 1:** Percent
2. **Notes 2:** Decimal
3. **Notes 3:** Equivalent
4. **Notes 4:** Benchmark
5. **Notes 5:** Discount
6. **Watch for this mistake:** *A common mistake in Relate Fractions, Decimals, and Percents is treating the numerator and denominator as the percent's digits instead of dividing — for example, turning 3/5 into "35%" by just reading the 3 and the 5, instead of dividing 3 ÷ 5 = 0.6 and multiplying by 100 to get the correct 60%. A second version of this mistake is dividing the denominator by the numerator (flipping the division), like computing 8 ÷ 5 = 1.6 for 5/8 instead of 5 ÷ 8 = 0.625 — always divide the top (numerator) by the bottom (denominator), never the other way around.*
7. **Try It 1:** A. 25% and 1/4 — *Move the decimal two places: 0.25 = 25%. As a fraction, 0.25 = 25/100 = 1/4.*
8. **Try It 2:** A. 0.6 and 60% — *Divide 3 ÷ 5 = 0.6, then multiply by 100: 0.6 = 60%. So 3/5 = 0.6 = 60%.*
