**UNIT 1 · STANDARD 5.NF.B.4**

# Math is Exploring and Thinking

Lesson 1-2 · Teacher Copy

**Name:** Type your name **Date:** Today's date **Class:** Class period

## My Notes Level 2 Standard

🎯 **TODAY'S OBJECTIVES**

**Content Objective: I can make sense of a problem, plan a strategy, and use fractions of a whole number to compare quantities.**

**Language Objective: I can explain my plan using the words we know, we don't know, and my strategy is ____ .**

📖 See **Learn It** for the explanation and worked examples, and the **Vocab** tab for the words. These are your notes to fill in and keep.

✏️ **Fill in each blank as we go. Use the Word Bank to help you.**

📚 **WORD BANK — FILL EACH BLANK WITH THE BEST WORD**

quantity | relationship | strategy | reasonable | persevere

👆 *Tap any word to see what it means and a picture.*

1. ________ — An amount in a problem — a number with a meaning attached, like 540 meters.

2. ________ — How two quantities compare or connect to each other.

3. ________ — A plan for how to solve a problem before you start computing.

4. ________ — A solution that makes sense in the context of the problem.

5. ________ — To keep working on a problem, checking your progress and adjusting your plan when you get stuck.

## Write About the Math

Guided ESOL writing

Use the support level you need. Every level answers the same math question.

### 1. Understand the Question

EXPLAIN

**How can you use the relationships among the distances to choose possible values for how far Deon, Miguel, and Evelyn walked?**

**Your job:** Answer the question. Use math evidence. Explain how the evidence proves your answer.

*Responde la pregunta. Usa evidencia matemática. Explica cómo la evidencia demuestra tu respuesta.*

## 2. Plan Your Math Words

Check at least two words you will use.

- [ ] **quantity** — An amount in a problem — a number with a meaning attached, like 540 meters.
  *cantidad — Una cantidad en un problema: un número con un significado, como 540 metros.*
- [ ] **relationship** — How two quantities compare or connect to each other.
  *relación — Cómo se comparan o se conectan dos cantidades entre sí.*
- [ ] **strategy** — A plan for how to solve a problem before you start computing.
  *estrategia — Un plan para resolver un problema antes de empezar a calcular.*
- [ ] **reasonable** — A solution that makes sense in the context of the problem.
  *razonable — Una solución que tiene sentido en el contexto del problema.*
- [ ] **persevere** — To keep working on a problem, checking your progress and adjusting your plan when you get stuck.
  *perseverar — Seguir trabajando en un problema, revisando tu progreso y ajustando tu plan cuando te atascas.*

**Say it first:** Say your idea to a partner or quietly to yourself before you write.
*Di tu idea a un compañero o en voz baja antes de escribir.*

**Pick a distance for Miguel. Then choose a distance for Deon that is ____ than Miguel's and a distance for Evelyn that is ____ than Miguel's, and explain how you ____ that your three values work.**
*Di tu respuesta primero: Mi respuesta es ____ porque ____.*

## 3. Build Your Explanation

**Model the parts:** This model shows the parts of an explanation. It does not answer your writing question.

**Claim:** The lesson's warm-up decomposes 105.76 several different ways, and each decomposition must sum back to 105.76.

**Evidence:** A strong answer explains that each digit must land in its correct place value so the parts add back to exactly 105.76. A weak answer just says '100 and 5.76 are parts' without checking they sum correctly.

**Reasoning:** This evidence connects the definition of quantity to the mathematical claim.

### Start

**Most language support**

Complete the frames. Use the word bank.

*Completa las oraciones. Usa el banco de palabras.*

- **Pick a distance for Miguel. Then choose a distance for Deon that is ____ than Miguel's and a distance for Evelyn that is ____ than Miguel's, and explain how you ____ that your three values work.**
- **My answer is ____.**

  *Mi respuesta es ____.*

### Build

**Some language support**

Write two connected sentences. Use because, so, or but.

*Escribe dos oraciones conectadas. Usa porque, entonces o pero.*

- **My claim is ____.**

  *Mi afirmación es ____.*
- **I know because ____.**

  *Lo sé porque ____.*
- **So ____.**

  *Entonces ____.*

### Explain

**Light language support**

Write a claim, give math evidence, and explain your reasoning.

*Escribe una afirmación, da evidencia matemática y explica tu razonamiento.*

- **My claim is ____.**
  *Mi afirmación es ____.*
- **My math evidence is ____.**
  *Mi evidencia matemática es ____.*
- **This proves ____ because ____.**
  *Esto demuestra ____ porque ____.*

## 4. Check Your Explanation

- [ ] I answered the question.
  *Respondí la pregunta.*
- [ ] I used math evidence: numbers, an equation, a model, or a comparison.
  *Usé evidencia matemática: números, una ecuación, un modelo o una comparación.*
- [ ] I explained how the evidence proves my answer.
  *Expliqué cómo la evidencia demuestra mi respuesta.*
- [ ] I used at least two math words.
  *Usé por lo menos dos palabras matemáticas.*
- [ ] I reread complete sentences and punctuation.
  *Volví a leer mis oraciones completas y la puntuación.*

## Writing Guide — Teacher Copy

The support level changes the amount of language scaffolding, not the mathematical expectation. Look for the same five features in every response.

- I answered the question.
- I used math evidence: numbers, an equation, a model, or a comparison.
- I explained how the evidence proves my answer.
- I used at least two math words.
- I reread complete sentences and punctuation.

## Answer Key & Teacher Guide

1. **Notes 1:** quantity
2. **Notes 2:** relationship
3. **Notes 3:** strategy
4. **Notes 4:** reasonable
5. **Notes 5:** persevere
6. **Watch for this mistake:** *Expecting a fraction of a number to be bigger than the number — 5/6 × 540 must be LESS than 540 because 5/6 is less than 1; only a fraction greater than 1, like 6/5, makes the product bigger.*
7. **Try It 1:**
8. **Try It 2:**
