UNIT 2 · STANDARD 6.NOS.1

Fraction Division Problem Solving

Lesson 2-5 · Teacher Copy

Name: Type your name **Date:** Today's date **Class:** Class period

My Notes `Level 2 Standard`

🎯 **TODAY'S OBJECTIVES**

Content Objective: I can solve real-world problems by writing and solving fraction division equations.

Language Objective: I can explain my reasoning using the words model, equation, solution, and reasonableness.

📖 See **Learn It** for the explanation and worked examples, and the **Vocab** tab for the words. These are your notes to fill in and keep.

✏️ **Fill in each blank as we go. Use the Word Bank to help you.**

📚 **WORD BANK — FILL EACH BLANK WITH THE BEST WORD**

Model | **Equation** | **Solution** | **Reasonableness** | **Inverse operations**

👆 *Tap any word to see what it means and a picture.*

1. A drawing or diagram that shows a math situation is a ______________.

2. A math sentence that says two amounts are equal, with an = sign, is an ______________.

3. The value that makes an equation true is the ______________.

4. Checking whether an answer makes sense for the problem is checking its ______________.

5. Operations that undo each other, like multiplication and division, are ______________.

Reflect — Exit Ticket

A pipe is 3/4 meter long. Each connector piece is 3/8 meter. How many connectors fit on the pipe?

A. 2

B. 9/32

C. 3/2

D. 6

Your answer:

Answer Key & Teacher Guide

1. **Notes 1:** Model
2. **Notes 2:** Equation
3. **Notes 3:** Solution
4. **Notes 4:** Reasonableness
5. **Notes 5:** Inverse operations
6. **Watch for this mistake:** *A common mistake in Fraction Division Problem Solving is skipping the key idea: "Total goes first (dividend), group size goes second (divisor): total ÷ group size. Then check your answer by multiplying it back." — always check your work against this rule before you submit.*
7. **Try It 1:** A. 5 — *The total distance (5/6 mile) is the dividend and the checkpoint spacing (1/6 mile) is the divisor: 5/6 ÷ 1/6 = 5/6 × 6/1 = 30/6 = 5 checkpoints.*
8. **Try It 2:** A. 3 — *The total (9/10 liter) is the dividend and each vial (3/10 liter) is the divisor: 9/10 ÷ 3/10 = 9/10 × 10/3 = 90/30 = 3 vials, so the code is 3.*
9. **Exit Ticket:** A. 2 — *3/4 ÷ 3/8 = 3/4 × 8/3 = 24/12 = 2. Two connector pieces fit on the pipe.*
