Area of Triangles Flagship

Lesson 5-3-flagship

Name: Type your name **Date:** Today's date **Class:** Class period

---

SKY HARBOR MISSION

The Triangular Skylight

You are the lead architect at Sky Harbor Studio. The city has hired your firm to design a glass skylight made of triangular panels for the new transit hub. Before the glass can be cut, you must master the area of triangles — every wrong measurement wastes expensive glass.

My Notes Level 1 Support

🎯 **TODAY'S OBJECTIVES**

Content Objective: I can find the area of a triangle using the formula A = ½ × base × height.
Language Objective: I can explain my steps using the words base, height, area, and perpendicular.

📖 See **Learn It** for the explanation and worked examples, and the **Vocab** tab for the words. These are your notes to fill in and keep.

✏️ **Fill in each blank as we go. Use the Word Bank to help you.**

📚 **WORD BANK — FILL EACH BLANK WITH THE BEST WORD**

Base | **Height** | **Area** | **Perpendicular** | **Composite figure** | **Formula**

👆 *Tap any word to see what it means and a picture.*

1. The side of a triangle used as the bottom for measuring area is the ________.

2. The perpendicular distance from the base to the opposite vertex is the ________.

3. The amount of flat space inside a triangle is its ________.

4. Two lines that meet at a 90° angle are ________.

5. A shape made of two or more basic shapes combined is a ________.

6. A math rule written with symbols, like A = ½ × b × h, is a ________.

Reflect — Exit Ticket

A triangle has a base of 11 inches and a height of 8 inches. What is its area?

A. 44 sq in

B. 88 sq in

C. 19 sq in

D. 44 in

Your answer:
