UNIT 1 · STANDARD 6.NOS.3

Divide Decimals

Lesson 1-7 · Teacher Copy

Name: Type your name **Date:** Today's date **Class:** Class period

My Notes

Level 2 Standard

🎯 **TODAY'S OBJECTIVES**

Content Objective: I can divide with decimals by making the divisor a whole number first.
Language Objective: I can explain my work using the words dividend, divisor, quotient, and equivalent division.

📖 See **Learn It** for the explanation and worked examples, and the **Vocab** tab for the words. These are your notes to fill in and keep.

✏️ **Fill in each blank as we go. Use the Word Bank to help you.**

📚 **WORD BANK — FILL EACH BLANK WITH THE BEST WORD**

Dividend | Divisor | Quotient | Decimal division | Equivalent division

👆 *Tap any word to see what it means and a picture.*

1. In a division problem, the number being divided is the ________.

2. In a division problem, the number we divide by is the ________.

3. The answer to a division problem is the ________.

4. Dividing numbers that include a decimal point is called ________.

5. Multiplying both the dividend and divisor by the same power of 10 creates an ________ that is easier to solve.

Write About the Math **Guided ESOL writing**

Use the support level you need. Every level answers the same math question.

1. Understand the Question

EXPLAIN

When you divided 18.9 by 6.3, how did you use equivalent division to make the divisor a whole number?

Your job: Answer the question. Use math evidence. Explain how the evidence proves your answer.

Responde la pregunta. Usa evidencia matemática. Explica cómo la evidencia demuestra tu respuesta.

2. Plan Your Math Words

Check at least two words you will use.

- ☐ **Dividend** — The number you are splitting up in a division problem.
  Dividendo — El número que estás repartiendo en una división.
- ☐ **Divisor** — The number you split by in a division problem.
  Divisor — El número entre el que divides en una división.
- ☐ **Quotient** — The answer when you divide.
  Cociente — La respuesta cuando divides.
- ☐ **Decimal division** — Dividing with decimals. First make the number you divide by a whole number.
  División decimal — Dividir con decimales. Primero haz entero el número entre el que divides.
- ☐ **Equivalent division** — Multiplying both numbers by 10 or 100 gives the same answer.
  División equivalente — Multiplicar ambos números por 10 o 100 da la misma respuesta.

Say it first: Say your idea to a partner or quietly to yourself before you write.
Di tu idea a un compañero o en voz baja antes de escribir.

I moved both decimal points ____ place, changing it to ____ ÷ ____.
Moví ambos puntos decimales ____ lugar, cambiándolo a ____ ÷ ____.

3. Build Your Explanation

Model the parts: This model shows the parts of an explanation. It does not answer your writing question.

Claim: You first make the divisor a whole number using equivalent division.

Evidence: Students explain you move the decimal in the divisor to make it whole (6.3 to 63) and move the dividend the same way, naming 18.9 as the dividend and 6.3 as the divisor.

Reasoning: This evidence connects the definition of dividend to the mathematical claim.

Start

Most language support

Complete the frames. Use the word bank.

Completa las oraciones. Usa el banco de palabras.

- **I moved both decimal points ____ place, changing it to ____ ÷ ____.**
  Moví ambos puntos decimales ____ lugar, cambiándolo a ____ ÷ ____.
- **The quotient is ____.**
  El cociente es ____.

Build

Some language support

Write two connected sentences. Use because, so, or but.

Escribe dos oraciones conectadas. Usa porque, entonces o pero.

- **My claim is ____.**
  Mi afirmación es ____.
- **I know because ____.**
  Lo sé porque ____.
- **So ____.**
  Entonces ____.

Explain

Light language support

Write a claim, give math evidence, and explain your reasoning.

Escribe una afirmación, da evidencia matemática y explica tu razonamiento.

- **My claim is ____.**
  Mi afirmación es ____.
- **My math evidence is ____.**
  Mi evidencia matemática es ____.
- **This proves ____ because ____.**
  Esto demuestra ____ porque ____.

4. Check Your Explanation

- [ ] I answered the question.
  Respondí la pregunta.
- [ ] I used math evidence: numbers, an equation, a model, or a comparison.
  Usé evidencia matemática: números, una ecuación, un modelo o una comparación.
- [ ] I explained how the evidence proves my answer.
  Expliqué cómo la evidencia demuestra mi respuesta.
- [ ] I used at least two math words.
  Usé por lo menos dos palabras matemáticas.
- [ ] I reread complete sentences and punctuation.
  Volví a leer mis oraciones completas y la puntuación.

Writing Guide — Teacher Copy

The support level changes the amount of language scaffolding, not the mathematical expectation. Look for the same five features in every response.

- I answered the question.
- I used math evidence: numbers, an equation, a model, or a comparison.
- I explained how the evidence proves my answer.
- I used at least two math words.
- I reread complete sentences and punctuation.

Answer Key & Teacher Guide

1. **Notes 1:** Dividend
2. **Notes 2:** Divisor
3. **Notes 3:** Quotient
4. **Notes 4:** Decimal division
5. **Notes 5:** Equivalent division
6. **Watch for this mistake:** *A common mistake in Divide Decimals is moving the decimal point in the divisor but forgetting to move it the same number of places in the dividend. For example, in 6.4 ÷ 0.8 a student changes 0.8 to 8 but leaves the dividend as 6.4, then divides 6.4 ÷ 8 = 0.8 instead of moving both points to get 64 ÷ 8 = 8. A second version of this mistake happens when the divisor has two decimal places, like 0.12: students move both points only 1 place instead of 2, turning 9.6 ÷ 0.12 into 96 ÷ 1.2 instead of the correct 960 ÷ 12. Count the divisor's decimal places first, then move BOTH points that same number of places.*
7. **Try It 1:** A. 3.2 cups — *9.6 ÷ 3 = 3.2 cups in each batch.*
8. **Try It 2:** A. 9 strips — *Multiply both by 10: 81 ÷ 9 = 9 strips.*
