Equivalent Ratio Card Capture

Unit 3: Culinary Academy · Lesson 3-4 · EduWonderLab

UNIT 3 · LESSON 3-4 · TEACHER NOTES | **Standard 6.RP.3**

FORMAT **Matching capture game**	TIME **25–30 min**
GROUPING **Pairs**	TOPIC **Equivalent Ratios**
STANDARD **6.RP.3**	PREP LEVEL **Light — print ratio cards and proof box**

Learning goal *I can decide whether two ratios are equivalent and prove it.*

Teacher setup

- Print one card set per pair. Each card shows two ratios.
- Students decide if the ratios are equivalent, then prove it.
- A capture only counts with a written proof (×, ÷, or a table).

Materials

Ratio cards, Proof box, Multiplication/division arrows, Pencil.

Differentiation & language support

- Proof box keeps the “show why” step visible (SPED).
- Sentence stem: “These are/are not equivalent because ___.”
- ESOL: model one match aloud before students start.

Key vocabulary (English / Español):

Term	Español	What it means
equivalent	equivalente	equal in value
simplify	simplificar	to reduce to lowest terms

Quick teacher check: *Check the proof for Card 4 (the non-equivalent pair).*

Equivalent Ratio Card Capture

Unit 3: Culinary Academy · Lesson 3-4 · EduWonderLab

Name: **Date:** **Class:**

Your goal: *I can decide whether two ratios are equivalent and prove it.*

What you need

Ratio cards, Proof box.

How to play

1. Pick a card with two ratios.
2. Decide if they are equivalent.
3. Prove it: multiply, divide, or simplify both ratios.
4. Capture the card only if your proof is written down.

Ratio Pairs

Decide if each pair of ratios is equivalent. Prove it with multiplication, division, or a table.

1. 2 : 3 and 8 : 12	**2.** 3 : 5 and 9 : 15
3. 4 : 6 and 2 : 3	**4.** 5 : 2 and 15 : 8
5. 6 : 9 and 2 : 3	**6.** 1 : 4 and 5 : 20
7. 7 : 3 and 21 : 9	**8.** 8 : 12 and 6 : 9

Proof box (show your reasoning):

Explain your thinking

Explain how simplifying both ratios can prove they are equivalent.

Sentence frame: *These ratios are ___ equivalent because ___.*

★ **Challenge:** *Fix Card 4 so the two ratios become equivalent. (Change 15 : 8 to 15 : 6.)*

ANSWER KEY

Teacher copy — please do not distribute to students.

UNIT 3 · LESSON 3-4 · Equivalent Ratio Card Capture | **Standard 6.RP.3**

Answers

1. 2 : 3 and 8 : 12 **Answer: Equivalent — ×4**	**2.** 3 : 5 and 9 : 15 **Answer: Equivalent — ×3**
3. 4 : 6 and 2 : 3 **Answer: Equivalent — ÷2**	**4.** 5 : 2 and 15 : 8 **Answer: NOT equivalent — ×3 gives 15 : 6, not 15 : 8**
5. 6 : 9 and 2 : 3 **Answer: Equivalent — ÷3**	**6.** 1 : 4 and 5 : 20 **Answer: Equivalent — ×5**
7. 7 : 3 and 21 : 9 **Answer: Equivalent — ×3**	**8.** 8 : 12 and 6 : 9 **Answer: Equivalent — both simplify to 2 : 3**

Teaching notes & look-fors

- Only Card 4 is non-equivalent.
- Two ratios are equivalent if they simplify to the same lowest-terms ratio.
