UNIT 5 · STANDARD 6.GR.1

Apply Area Concepts to Solve Problems

Lesson 5-4 · Teacher Copy

Name: Type your name **Date:** Today's date **Class:** Class period

My Notes `Level 2 Standard`

🎯 **TODAY'S OBJECTIVES**

Content Objective: I can find the area of a composite figure by adding or subtracting the areas of basic shapes.
Language Objective: I can explain my steps using the words composite figure, decompose, add, and subtract.

📖 See **Learn It** for the explanation and worked examples, and the **Vocab** tab for the words. These are your notes to fill in and keep.

✏️ **Fill in each blank as we go. Use the Word Bank to help you.**

📚 **WORD BANK — FILL EACH BLANK WITH THE BEST WORD**

Area of Composite Figures | **Composite Figure** | **Decompose** | **Add** | **Subtract** | **Formula**

👆 *Tap any word to see what it means and a picture.*

1. The space inside a figure made of basic shapes, found with $A = A_1 + A_2$, is the ________.

2. A shape made of two or more basic shapes combined is a ________.

3. To break a composite figure into basic shapes is to ________ it.

4. To find the total area of separate parts, I ________ their areas.

5 To find the area of a shape with a piece removed, I ______ the missing part's area.

6 A math rule written with symbols is a ______.

Write About the Math

Guided ESOL writing

Use the support level you need. Every level answers the same math question.

1. Understand the Question

EXPLAIN

How much will the carpet cost?

Your job: Answer the question. Use math evidence. Explain how the evidence proves your answer.

Responde la pregunta. Usa evidencia matemática. Explica cómo la evidencia demuestra tu respuesta.

2. Plan Your Math Words

Check at least two words you will use.

- [ ] **Area of Composite Figures** — The total space inside a figure made of basic shapes. Formula: $A = A_1 + A_2$ — add the parts (or subtract a missing piece).
  Área de figuras compuestas — El espacio total dentro de una figura formada por figuras básicas. Fórmula: $A = A_1 + A_2$ — suma las partes (o resta la pieza que falta).

- [ ] **Composite Figure** — A shape made by putting two or more simple shapes together.
  Figura compuesta — Una figura formada al juntar dos o más figuras simples.

- [ ] **Decompose** — To break a shape into smaller, simpler shapes.
  Descomponer — Separar una figura en figuras más pequeñas y simples.

- [ ] **Add** — Add up the areas of the smaller shapes to get the total.
  Sumar — Sumar las áreas de las figuras pequeñas para obtener el total.

- [ ] **Subtract** — Take away the area of a missing piece from a bigger shape.
  Restar — Quitar el área de una parte que falta de una figura más grande.

Say it first: Say your idea to a partner or quietly to yourself before you write.
Di tu idea a un compañero o en voz baja antes de escribir.

The top area is ____ sq ft and the stem area is ____ sq ft. Total = ____ + ____ = ____ sq ft. Cost = ____ x $5 = $____.

Di tu respuesta primero: Mi respuesta es ____ porque ____.

3. Build Your Explanation

Model the parts: This model shows the parts of an explanation. It does not answer your writing question.

Claim: We decompose the L-shape because we already know how to find a rectangle's area.

Evidence: Students explain that the L-shape is hard to measure directly, so breaking it into two rectangles lets them use A = l x w on each piece and add the results.

Reasoning: This evidence connects the definition of area of composite figures to the mathematical claim.

Start

Most language support

Complete the frames. Use the word bank.

Completa las oraciones. Usa el banco de palabras.

- **The top area is ____ sq ft and the stem area is ____ sq ft. Total = ____ + ____ = ____ sq ft. Cost = ____ x $5 = $____.**
- **My answer is ____.**
  Mi respuesta es ____.

Build

Some language support

Write two connected sentences. Use because, so, or but.

Escribe dos oraciones conectadas. Usa porque, entonces o pero.

- **My claim is ____.**
  Mi afirmación es ____.
- **I know because ____.**
  Lo sé porque ____.
- **So ____.**
  Entonces ____.

Explain

Light language support

Write a claim, give math evidence, and explain your reasoning.

Escribe una afirmación, da evidencia matemática y explica tu razonamiento.

- **My claim is ____.**
  Mi afirmación es ____.
- **My math evidence is ____.**
  Mi evidencia matemática es ____.
- **This proves ____ because ____.**
  Esto demuestra ____ porque ____.

4. Check Your Explanation

- [ ] I answered the question.
  Respondí la pregunta.
- [ ] I used math evidence: numbers, an equation, a model, or a comparison.
  Usé evidencia matemática: números, una ecuación, un modelo o una comparación.
- [ ] I explained how the evidence proves my answer.
  Expliqué cómo la evidencia demuestra mi respuesta.
- [ ] I used at least two math words.
  Usé por lo menos dos palabras matemáticas.
- [ ] I reread complete sentences and punctuation.
  Volví a leer mis oraciones completas y la puntuación.

Writing Guide — Teacher Copy

The support level changes the amount of language scaffolding, not the mathematical expectation. Look for the same five features in every response.

- I answered the question.
- I used math evidence: numbers, an equation, a model, or a comparison.
- I explained how the evidence proves my answer.
- I used at least two math words.
- I reread complete sentences and punctuation.

Answer Key & Teacher Guide

1. **Notes 1:** Area of Composite Figures
2. **Notes 2:** Composite Figure
3. **Notes 3:** Decompose
4. **Notes 4:** Add
5. **Notes 5:** Subtract
6. **Notes 6:** Formula
7. **Watch for this mistake:** *A common mistake in Area of Composite Figures is adding every piece even when a piece has been cut out of the figure. For a 10 ft by 8 ft rectangle with a 3 ft by 2 ft rectangular notch cut from one corner, students compute the full rectangle 10 × 8 = 80 sq ft and stop, or they add the notch instead of removing it (80 + 6 = 86 sq ft) instead of subtracting it: 80 − (3 × 2) = 80 − 6 = 74 sq ft. Before submitting, check whether each piece is part of the figure (add it) or missing from the figure (subtract it).*
8. **Try It 1:** A. 75 sq ft — *First rectangle = 9 x 6 = 54 sq ft. Second rectangle = 7 x 3 = 21 sq ft. Joined L-shape, so add: 54 + 21 = 75 sq ft.*
9. **Try It 2:** A. 172 sq ft — *Large rectangle = 16 x 12 = 192 sq ft. Cutout closet = 5 x 4 = 20 sq ft. A piece is removed, so subtract: 192 - 20 = 172 sq ft.*
