UNIT 9 · STANDARD 6.NOS.8

Compare and Order Integers

Lesson 9-3 · Teacher Copy

Name: Type your name **Date:** Today's date **Class:** Class period

My Notes Level 3 Enrichment

🎯 **TODAY'S OBJECTIVES**

Content Objective: I can compare and order integers using a number line.

Language Objective: I can explain my reasoning using the words compare, order, greater than, and less than.

📖 See **Learn It** for the explanation and worked examples, and the **Vocab** tab for the words. These are your notes to fill in and keep.

✏️ **Fill in each blank as we go. Use the Word Bank to help you.**

📚 **WORD BANK — FILL EACH BLANK WITH THE BEST WORD**

Number line | **Compare** | **Order** | **Greater than** | **Less than** | **Negative integer** | **Integer**

👆 *Tap any word to see what it means and a picture.*

Level 3: try the blanks from memory first, then check the bank.

1. To plot integers in order, place them on a ______________.

2. To decide which number is larger or smaller is to ______________ them.

3. To arrange numbers from least to greatest or greatest to least is to ______________ them.

4. On a number line, a number farther to the right is ______________ another number.

5. On a number line, a number farther to the left is ______________ another number.

6 An integer less than zero, like −6, is a ________.

7 A whole number or its opposite is an ________.

Reflect — Exit Ticket

Which list shows the integers in order from LEAST to GREATEST?

A. -2, -5, 0, 3, 7

B. 7, 3, 0, -2, -5

C. -5, -2, 0, 3, 7

D. 0, -2, -5, 3, 7

Your answer:

Answer Key & Teacher Guide

1. **Notes 1:** Number line
2. **Notes 2:** Compare
3. **Notes 3:** Order
4. **Notes 4:** Greater than
5. **Notes 5:** Less than
6. **Notes 6:** Negative integer
7. **Notes 7:** Integer
8. **Watch for this mistake:** *A common mistake in Compare and Order Integers is skipping the key idea: "The number farther to the left is always less; the number farther to the right is always greater." — always check your work against this rule before you submit.*
9. **Try It 1:** A. -4 m — *Closer to zero means greater for negatives. -4 is only 4 below the surface, so -4 is the greatest of -9, -4, and -15.*
10. **Try It 2:** A. < — *-8 is farther left (deeper) than -3, so -8 is less than -3. The symbol is <.*
11. **Exit Ticket:** C. -5, -2, 0, 3, 7 — *-5 is the smallest (farthest left on the number line), then -2, then 0, then 3, then 7. The correct order from least to greatest is -5, -2, 0, 3, 7.*
