UNIT 4 · STANDARD 6.AT.4

Relate Fractions, Decimals, and Percentages

Lesson 4-2 · Teacher Copy

Name: Type your name **Date:** Today's date **Class:** Class period

My Notes Level 2 Standard

🎯 **TODAY'S OBJECTIVES**

Content Objective: I can write equivalent fractions, decimals, and percents for the same value.

Language Objective: I can explain my conversions using the words percent, decimal, equivalent, and benchmark.

📖 See **Learn It** for the explanation and worked examples, and the **Vocab** tab for the words. These are your notes to fill in and keep.

✏️ **Fill in each blank as we go. Use the Word Bank to help you.**

📚 **WORD BANK — FILL EACH BLANK WITH THE BEST WORD**

Fractions, Decimals, and Percents | Percent | Decimal | Equivalent | Benchmark | Discount

👆 *Tap any word to see what it means and a picture.*

1. Three equivalent ways to name the same part of a whole are ________, ________ and ________.

2. A ratio that compares a number to 100, written with a % sign, is a ________.

3. A number that uses a point to show parts of a whole is a ________.

4. Having the same value but written a different way is being ________.

5 A common, easy-to-remember value like 50% or 1/4 used for comparing is a ______________.

6 An amount taken off a price, often given as a percent, is a ______________.

Write About the Math

Who is correct, and how much would the game cost on sale?
¿Quién tiene razón, y cuánto costaría el juego en oferta?

Say your answer to a partner first. Then write it, using at least two of these words:

- ☐ **Fractions, Decimals, and Percents** — *Fracciones, decimales y porcentajes*
- ☐ **Percent** — *Porcentaje*
- ☐ **Decimal** — *Decimal*
- ☐ **Equivalent** — *Equivalente*
- ☐ **Benchmark** — *Referencia*

Model: *3/4, 0.75, and 75% all name the same score.* — Students give 3/4 = 0.75 = 75% and recognize these are three forms of one value, not three different scores.

Start

Complete the frames. Use the word bank.
Completa las oraciones. Usa el banco de palabras.

- **The friend who said ____% is correct because 3/5 = ____ = ____%. The sale price is $____.**
- **My answer is ____ because ____.**
  Mi respuesta es ____ porque ____.

Build

Write two connected sentences. Use because, so, or but.
Escribe dos oraciones conectadas. Usa porque, entonces o pero.

- **My claim is ____.**
  Mi afirmación es ____.
- **My evidence is ____, so ____.**
  Mi evidencia es ____, entonces ____.

Explain

Write a claim, give math evidence, and explain your reasoning.

Escribe una afirmación, da evidencia matemática y explica tu razonamiento.

- [ ] I answered the question.
- [ ] I used math evidence: numbers, an equation, or a model.
- [ ] I used at least two math words.

Writing Guide — Teacher Copy

- The answer to the math question is correct.
- The evidence is real lesson mathematics (numbers, equation, or model), not restated claim.
- The support level changed the language scaffolding, never the mathematical expectation.

Answer Key & Teacher Guide

1. **Notes 1:** Fractions, Decimals, and Percents
2. **Notes 2:** Percent
3. **Notes 3:** Decimal
4. **Notes 4:** Equivalent
5. **Notes 5:** Benchmark
6. **Notes 6:** Discount
7. **Watch for this mistake:** *A common mistake in Relate Fractions, Decimals, and Percents is treating the numerator and denominator as the percent's digits — turning 3/5 into "35%" by just reading the 3 and the 5. Percent means out of 100, so the fix is to build an equivalent fraction with denominator 100: 5 × 20 = 100, so multiply the top by 20 too — 3/5 = 60/100 = 60%. A second version of this mistake is scaling only ONE part of the fraction (writing 3/5 = 3/100 or 60/5). Whatever you multiply the denominator by, you must multiply the numerator by the same number. When a denominator will not reach 100 evenly (8, 3, 7), divide the numerator by the denominator instead and then multiply by 100.*
8. **Try It 1:** A. 25% and 1/4 *— Move the decimal two places: 0.25 = 25%. As a fraction, 0.25 = 25/100 = 1/4.*
9. **Try It 2:** A. 0.6 and 60% *— 5 × 20 = 100 and 3 × 20 = 60, so 3/5 = 60/100 = 0.6 = 60%.*
