UNIT 3 · STANDARD 6.AT.3

Compare Ratio Relationships

Lesson 3-5 · Teacher Copy

Name: Type your name **Date:** Today's date **Class:** Class period

My Notes Level 1 Support

🎯 **TODAY'S OBJECTIVES**

Content Objective: I can compare ratios by finding unit rates or using equivalent ratios.

Language Objective: I can explain my comparison using the words unit rate, equivalent ratio, compare, and common denominator.

📖 See **Learn It** for the explanation and worked examples, and the **Vocab** tab for the words. These are your notes to fill in and keep.

✏️ **Fill in each blank as we go. Use the Word Bank to help you.**

📚 **WORD BANK — FILL EACH BLANK WITH THE BEST WORD**

Compare Ratios | Unit rate | Equivalent ratio | Compare | Simplify | Common denominator

👆 *Tap any word to see what it means and a picture.*

1. Make the __________ match, or find each __________ __________, before deciding which ratio is greater.

2. A rate that tells the amount for exactly one unit, like 5 miles per 1 hour, is a __________.

3. Two ratios that make the same comparison are __________ __________.

4. To decide which ratio is greater or if they are equal is to __________ them.

5. Writing a ratio with smaller numbers that compares the same way, like 6:9 = 2:3, is to ______ it.

6. A denominator shared by two fractions so they can be compared is a ______.

Write About the Math

Two pizza shops are running deals. Mario's Pizza sells 2 large pizzas for $18. Sal's Pizza sells 3 large pizzas for $25. A school needs to buy pizza for a class party and wants to get the best deal per pizza?

Say your answer to a partner first. Then write it, using at least two of these words:

- ☐ **Compare Ratios** *Comparar razones*
- ☐ **Unit rate** *Tasa unitaria*
- ☐ **Equivalent ratio** *Razón equivalente*
- ☐ **Compare** *Comparar*
- ☐ **Simplify** *Simplificar*

Model: *When both ratios share 35 oz of milk, you only have to compare the cocoa amounts.* — Students explain that equal milk (35 oz) makes the comparison fair, so 21 tbsp > 20 tbsp means Chef Reyes is more chocolatey.

Start

Complete the frames. Use the word bank.

Completa las oraciones. Usa el banco de palabras.

- **Mario's costs ____ per pizza and Sal's costs about ____ per pizza, so the better deal is ____.**
- **My answer is ____ because ____.**
  Mi respuesta es ____ porque ____.

Build

Write two connected sentences. Use because, so, or but.

Escribe dos oraciones conectadas. Usa porque, entonces o pero.

- **My claim is ____.**
  Mi afirmación es ____.
- **My evidence is ____, so ____.**
  Mi evidencia es ____, entonces ____.

Explain

Write a claim, give math evidence, and explain your reasoning.

Escribe una afirmación, da evidencia matemática y explica tu razonamiento.

- [ ] I answered the question.
- [ ] I used math evidence: numbers, an equation, or a model.
- [ ] I used at least two math words.

Writing Guide — Teacher Copy

- The answer to the math question is correct.
- The evidence is real lesson mathematics (numbers, equation, or model), not restated claim.
- The support level changed the language scaffolding, never the mathematical expectation.

Answer Key & Teacher Guide

1. **Notes 1:** Compare Ratios
2. **Notes 2:** Unit rate
3. **Notes 3:** Equivalent ratio
4. **Notes 4:** Compare
5. **Notes 5:** Simplify
6. **Notes 6:** Common denominator
7. **Watch for this mistake:** *A common mistake in Compare Ratios is thinking the ratio with the bigger raw number automatically wins — like assuming Chef Tran's 8 tablespoons of cocoa must be more chocolatey than Chef Reyes's 6 tablespoons, without checking that the milk amounts (14 oz vs. 10 oz) are different. Never compare the raw numbers alone — always scale both ratios to the same amount or find each unit rate first.*
8. **Try It 1:** B. Recipe A — *Recipe A: 4 / 10 = 0.4 tsp per cup. Recipe B: 3 / 8 = 0.375 tsp per cup. Since 0.4 > 0.375, Recipe A is saltier per cup.*
9. **Try It 2:** A. Chef Mara — *Chef Mara: 6 / 9 = 0.666... oz per cupcake. Chef Devi: 4 / 7 = 0.571... oz per cupcake. Since 0.67 > 0.57, Chef Mara's glaze has more lemon per cupcake.*
