UNIT 4 · STANDARD 6.AT.2

Solve Problems with Unit Rates

Lesson 4-7 · Teacher Copy

Name: Type your name **Date:** Today's date **Class:** Class period

My Notes Level 1 Support

🎯 **TODAY'S OBJECTIVES**

Content Objective: I can solve real-world problems by using unit rates to compare options.
Language Objective: I can explain my comparison using the words unit rate, better buy, per unit, and rate.

📖 See **Learn It** for the explanation and worked examples, and the **Vocab** tab for the words. These are your notes to fill in and keep.

✏️ **Fill in each blank as we go. Use the Word Bank to help you.**

📚 **WORD BANK — FILL EACH BLANK WITH THE BEST WORD**

Unit Rate | **Better Buy** | **Comparison** | **Per Unit** | **Rate** | **Proportion**

👆 *Tap any word to see what it means and a picture.*

1. A rate that gives the amount for exactly one unit is a ________.
2. The option that costs less per item, found by comparing unit rates, is the ________.
3. Showing how two amounts relate to each other is a ________.
4. The cost or amount for a single item is the cost ________.
5. A ratio comparing two quantities with different units is a ________.
6. An equation stating that two ratios are equal is a ________.

Reflect — Exit Ticket

A car travels 195 miles on 6 gallons of gas. What is the unit rate in miles per gallon?

A. 32.5 miles per gallon

B. 33 miles per gallon

C. 30 miles per gallon

D. 1,170 miles per gallon

Your answer:

Answer Key & Teacher Guide

1. **Notes 1:** Unit Rate
2. **Notes 2:** Better Buy
3. **Notes 3:** Comparison
4. **Notes 4:** Per Unit
5. **Notes 5:** Rate
6. **Notes 6:** Proportion
7. **Watch for this mistake:** *A common mistake in Solve Problems with Unit Rates is comparing the total prices instead of the cost per item — the deal with the smaller total can still cost more per unit. Always reduce each option to its unit rate before you decide, then pick the lower one.*
8. **Try It 1:** A. 50 miles per hour — *150 ÷ 3 = 50 miles per hour.*
9. **Try It 2:** A. 15 tickets for $3.00 — $0.20 each — *8 for $2.00: $2.00 ÷ 8 = $0.25 each. 15 for $3.00: $3.00 ÷ 15 = $0.20 each. $0.20 < $0.25, so 15 for $3.00 is cheaper per ticket.*
10. **Exit Ticket:** A. 32.5 miles per gallon — *195 ÷ 6 = 32.5 miles per gallon.*
