

Math is Everywhere

Lesson 10-1

Name:

Date:

Class:

My Notes

Level 2 Standard

TODAY'S OBJECTIVES

Content Objective: I can find applications of math outside of school — in professions like being a chef, in hobbies like gardening, and around my own house.

Language Objective: I can describe how someone uses math at work using the words plan, calculate, and measure.

See **Learn It** for the explanation and worked examples, and the **Vocab** tab for the words. These are your notes to fill in and keep.

Fill in each blank as we go. Use the Word Bank to help you.

WORD BANK — FILL EACH BLANK WITH THE BEST WORD

profession

5

The space something fills, in cubic units, is its

Write About the Math

Guided ESOL writing

Use the support level you need. Every level answers the same math question.

1. Understand the Question

EXPLAIN

How is math used in another profession or hobby that matters to you?

Your job: Answer the question. Use math evidence. Explain how the evidence proves your answer.

Responde la pregunta. Usa evidencia matemática. Explica cómo la evidencia demuestra tu respuesta.

2. Plan Your Math Words

Check at least two words you will use.

☐ **profession** — A job someone is trained to do, like chef, nurse, or carpenter.
profesión — Un trabajo para el que alguien se ha preparado, como chef, enfermero o carpintero.

☐ **inventory** — The supply of items a business keeps on hand, tracked by counting.
inventario — Las existencias que un negocio tiene disponibles, controladas contándolas.

☐ **portion** — The measured amount of food served to one person.
porción — La cantidad medida de comida que se sirve a una persona.

☐ **area** — The amount of flat space a surface covers, measured in square units.
área — La cantidad de espacio plano que cubre una superficie, medida en unidades cuadradas.

☐ **volume** — The amount of space something fills, measured in cubic units.
volumen — La cantidad de espacio que algo ocupa, medida en unidades cúbicas.

Say it first: Say your idea to a partner or quietly to yourself before you write.

Di tu idea a un compañero o en voz baja antes de escribir.

Think of a profession or hobby you care about. To do it well, that person might ____ amounts or prices, ____ distances or portions precisely, and ____ ahead so the work gets done on schedule.

Di tu respuesta primero: Mi respuesta es ____ porque ____.

3. Build Your Explanation

Model the parts: This model shows the parts of an explanation. It does not answer your writing question.

Claim: Area of the planter is $4 \times 2 = 8$ square feet (how many plants fit); volume is $4 \times 2 \times 1 = 8$ cubic feet (how much soil to buy).

Evidence: A strong answer names area ($4 \times 2 = 8$ square feet, a flat surface) and volume ($4 \times 2 \times 1 = 8$ cubic feet, a filled space) and explains why one is squared and one is cubed. A weak answer just says 'they use math' without naming either calculation.

Reasoning: This evidence connects the definition of profession to the mathematical claim.

Start

Most language support

Complete the frames. Use the word bank.

Completa las oraciones. Usa el banco de palabras.

- **Think of a profession or hobby you care about. To do it well, that person might ____ amounts or prices, ____ distances or portions precisely, and ____ ahead so the work gets done on schedule.**
- **My answer is ____.**

Mi respuesta es ____.

Build

Some language support

Write two connected sentences. Use because, so, or but.

Escribe dos oraciones conectadas. Usa porque, entonces o pero.

- **My claim is ____.**
Mi afirmación es ____.
- **I know because ____.**
Lo sé porque ____.
- **So ____.**
Entonces ____.

Explain

Light language support

Write a claim, give math evidence, and explain your reasoning.

Escribe una afirmación, da evidencia matemática y explica tu razonamiento.

- **My claim is ____.**
Mi afirmación es ____.
 - **My math evidence is ____.**
Mi evidencia matemática es ____.
 - **This proves ____ because ____.**
Esto demuestra ____ porque ____.
-
-
-

4. Check Your Explanation

- ☐ I answered the question.
Respondí la pregunta.
- ☐ I used math evidence: numbers, an equation, a model, or a comparison.
Usé evidencia matemática: números, una ecuación, un modelo o una comparación.
- ☐ I explained how the evidence proves my answer.
Explicué cómo la evidencia demuestra mi respuesta.
- ☐ I used at least two math words.
Usé por lo menos dos palabras matemáticas.
- ☐ I reread complete sentences and punctuation.
Volví a leer mis oraciones completas y la puntuación.
