

# Choose Appropriate Measures

Lesson 2-10

**Name:**

**Date:**

**Class:**

---

## My Notes

Level 3 Enrichment

### TODAY'S OBJECTIVES

**Content Objective:** I can choose the best measure of center for a data set based on its shape.

**Language Objective:** I can explain my choice using the words mean, median, outlier, and skewed.

See **Learn It** for the explanation and worked examples, and the **Vocab** tab for the words. These are your notes to fill in and keep.

**Fill in each blank as we go. Use the Word Bank to help you.**

### WORD BANK — FILL EACH BLANK WITH THE BEST WORD

Appropriate Measures of Center

Mean

Median

Outlier

Skewed

Data distribution

Variability

Tap any word to see what it means and a picture.

Level 3: try the blanks from memory first, then check the bank.

1

A center chosen because it describes the data fairly is an

2

The average of a data set is the .

3

The middle value when data is in order, often best when there is an outlier, is the

4

A value far from the rest of the data, which can pull the mean, is an

5 Data that is bunched on one side with a tail on the other is

.

6 The way data values are spread out is the  .

7 How much the data values differ is the  .

## Write About the Math

Guided ESOL writing

Use the support level you need. Every level answers the same math question.

### 1. Understand the Question

DESCRIBE

**Is \$85 a fair way to describe a 'typical' ticket price? What measure should the reporter use?**

**Your job:** Answer the question. Use math evidence. Explain how the evidence proves your answer.

*Responde la pregunta. Usa evidencia matemática. Explica cómo la evidencia demuestra tu respuesta.*

## 2. Plan Your Math Words

Check at least two words you will use.

☐ **Appropriate Measures of Center** — A mean, median, or mode chosen because it describes a data set fairly.  
*Medidas de centro apropiadas — Una media, mediana o moda elegida porque describe un conjunto de datos de manera justa.*

☐ **Mean** — The average. Add all the numbers, then divide by how many there are.  
*Media — El promedio. Suma todos los números y divide entre cuántos hay.*

☐ **Median** — The middle number when you put them in order.  
*Mediana — El número del medio cuando los pones en orden.*

☐ **Outlier** — A number that is much bigger or smaller than the rest.  
*Valor atípico — Un número mucho mayor o menor que los demás.*

☐ **Skewed** — When most data sits on one side with a tail on the other.  
*Sesgado — Cuando la mayoría de los datos está de un lado con una cola del otro.*

**Say it first:** Say your idea to a partner or quietly to yourself before you write.

*Di tu idea a un compañero o en voz baja antes de escribir.*

**The reporter used the \_\_\_\_, which is \_\_\_\_\_. A better measure would be the \_\_\_\_ (about \_\_\_\_) because \_\_\_\_\_. The courtside seat at \$260 is an \_\_\_\_ that pulls the mean \_\_\_\_.**

*Di tu respuesta primero: Mi respuesta es \_\_\_\_ porque \_\_\_\_.*

### 3. Build Your Explanation

**Model the parts:** This model shows the parts of an explanation. It does not answer your writing question.

**Claim:** An outlier can pull the mean away from what is typical, making the median a better choice.

**Evidence:** Students choose the median (23) and identify 58 as an outlier that pulls the mean up to 27.6, making it unrepresentative.

**Reasoning:** This evidence connects the definition of appropriate measures of center to the mathematical claim.

#### Start

Most language support

Complete the frames. Use the word bank.

*Completa las oraciones. Usa el banco de palabras.*

- The reporter used the \_\_\_\_, which is \_\_\_\_\_. A better measure would be the \_\_\_\_ (about \_\_\_\_) because \_\_\_\_\_. The courtside seat at \$260 is an \_\_\_\_ that pulls the mean \_\_\_\_.
- My answer is \_\_\_\_\_.

*Mi respuesta es \_\_\_\_\_.*

---

---

---

---

#### Build

Some language support

Write two connected sentences. Use because, so, or but.

*Escribe dos oraciones conectadas. Usa porque, entonces o pero.*

- My claim is \_\_\_\_\_.  
*Mi afirmación es \_\_\_\_\_.*
- I know because \_\_\_\_\_.  
*Lo sé porque \_\_\_\_\_.*
- So \_\_\_\_\_.  
*Entonces \_\_\_\_\_.*

---

---

## Explain

### Light language support

Write a claim, give math evidence, and explain your reasoning.

*Escribe una afirmación, da evidencia matemática y explica tu razonamiento.*

- **My claim is \_\_\_\_.**  
*Mi afirmación es \_\_\_\_.*
  - **My math evidence is \_\_\_\_.**  
*Mi evidencia matemática es \_\_\_\_.*
  - **This proves \_\_\_\_ because \_\_\_\_.**  
*Esto demuestra \_\_\_\_ porque \_\_\_\_.*
- 
- 
- 

## 4. Check Your Explanation

- ☐ I answered the question.  
*Respondí la pregunta.*
- ☐ I used math evidence: numbers, an equation, a model, or a comparison.  
*Usé evidencia matemática: números, una ecuación, un modelo o una comparación.*
- ☐ I explained how the evidence proves my answer.  
*Explicué cómo la evidencia demuestra mi respuesta.*
- ☐ I used at least two math words.  
*Usé por lo menos dos palabras matemáticas.*
- ☐ I reread complete sentences and punctuation.  
*Volví a leer mis oraciones completas y la puntuación.*
