

# Divide Multi-Digit Numbers Using an Algorithm

Lesson 2-6

**Name:**           Type your name

**Date:**           Today's date

**Class:**           Class period

---

## TODAY'S OBJECTIVES

**Content Objective:** I can divide multi-digit whole numbers and explain the meaning of the quotient and remainder.

**Language Objective:** I can explain my division using the words dividend, divisor, quotient, and remainder.

See **Learn It** for the explanation and worked examples, and the **Vocab** tab for the words. These are your notes to fill in and keep.

**Fill in each blank as we go. Use the Word Bank to help you.**

## WORD BANK — FILL EACH BLANK WITH THE BEST WORD

Divide Multi-Digit Numbers

Dividend

Divisor

Quotient

Remainder

Long division

Bring down

Tap any word to see what it means and a picture.

1 Long division repeats four steps: divide, multiply, subtract,

  .

2 In  $84 \div 7$ , the number 84 being divided is the .

3 In  $84 \div 7$ , the number 7 that we divide by is the .

4 The answer to a division problem is called the .

5 When a number does not divide evenly, the amount left over is the

 .

6 The method that repeats divide, multiply, subtract, and bring down is called

.

7 After you subtract in long division, the next step is to

the next digit.

## Write About the Math

Guided ESOL writing

Use the support level you need. Every level answers the same math question.

### 1. Understand the Question

EXPLAIN

**How does multi-digit division help the school figure out how many pencils each classroom gets?**

**Your job:** Answer the question. Use math evidence. Explain how the evidence proves your answer.

*Responde la pregunta. Usa evidencia matemática. Explica cómo la evidencia demuestra tu respuesta.*

## 2. Plan Your Math Words

Check at least two words you will use.

☐ **Divide Multi-Digit Numbers** — Separate a multi-digit number into equal groups to find a quotient.  
*Dividir números de varias cifras — Separar un número de varias cifras en grupos iguales para hallar un cociente.*

☐ **Dividend** — The number you are splitting up in a division problem.  
*Dividendo — El número que estás repartiendo en una división.*

☐ **Divisor** — The number you split by in a division problem.  
*Divisor — El número entre el que divides en una división.*

☐ **Quotient** — The answer when you divide.  
*Cociente — La respuesta cuando divides.*

☐ **Remainder** — What is left over when a number does not divide evenly.  
*Residuo — Lo que sobra cuando un número no se divide de forma exacta.*

**Say it first:** Say your idea to a partner or quietly to yourself before you write.

*Di tu idea a un compañero o en voz baja antes de escribir.*

**Each classroom gets \_\_\_\_ pencils because  $1,680 \div 24 =$  \_\_\_\_.**

*Di tu respuesta primero: Mi respuesta es \_\_\_\_ porque \_\_\_\_.*

### 3. Build Your Explanation

**Model the parts:** This model shows the parts of an explanation. It does not answer your writing question.

**Claim:** Estimating with friendly numbers checks whether the quotient is reasonable.

**Evidence:** Students estimate using  $1,200 \div 12 = 100$  (or similar) to predict roughly 100+ bars per section, identifying 1,344 as the dividend and 12 as the divisor.

**Reasoning:** This evidence connects the definition of divide multi-digit numbers to the mathematical claim.

#### Start

Most language support

Complete the frames. Use the word bank.

*Completa las oraciones. Usa el banco de palabras.*

- **Each classroom gets** \_\_\_\_ **pencils because**  $1,680 \div 24 =$  \_\_\_\_.
- **My answer is** \_\_\_\_.

*Mi respuesta es* \_\_\_\_.

---

---

---

#### Build

Some language support

Write two connected sentences. Use because, so, or but.

*Escribe dos oraciones conectadas. Usa porque, entonces o pero.*

- **My claim is** \_\_\_\_.
- **I know because** \_\_\_\_.

*Mi afirmación es* \_\_\_\_.

*Lo sé porque* \_\_\_\_.

- **So** \_\_\_\_.

*Entonces* \_\_\_\_.

---

---

---

---

## Explain

### Light language support

Write a claim, give math evidence, and explain your reasoning.

*Escribe una afirmación, da evidencia matemática y explica tu razonamiento.*

- **My claim is \_\_\_\_.**  
*Mi afirmación es \_\_\_\_.*
- **My math evidence is \_\_\_\_.**  
*Mi evidencia matemática es \_\_\_\_.*
- **This proves \_\_\_\_ because \_\_\_\_.**  
*Esto demuestra \_\_\_\_ porque \_\_\_\_.*

---

---

---

---

---

## 4. Check Your Explanation

- ☐ I answered the question.  
*Respondí la pregunta.*
- ☐ I used math evidence: numbers, an equation, a model, or a comparison.  
*Usé evidencia matemática: números, una ecuación, un modelo o una comparación.*
- ☐ I explained how the evidence proves my answer.  
*Explicué cómo la evidencia demuestra mi respuesta.*
- ☐ I used at least two math words.  
*Usé por lo menos dos palabras matemáticas.*
- ☐ I reread complete sentences and punctuation.  
*Volví a leer mis oraciones completas y la puntuación.*
