

# Unit Rate Shopping War

Unit 4: Arcade Builder · Lesson 4-1 · EduWonderLab

## UNIT 4 · LESSON 4-1 · TEACHER NOTES

Standard 6.RP.2

|                                          |                                                              |
|------------------------------------------|--------------------------------------------------------------|
| <b>FORMAT</b> Partner war / compare game | <b>TIME</b> 25–30 min                                        |
| <b>GROUPING</b> Pairs                    | <b>TOPIC</b> Rates and Unit Rates                            |
| <b>STANDARD</b> 6.RP.2                   | <b>PREP LEVEL</b> Light — print rate cards and unit-rate mat |

**Learning goal** *I can find a unit rate and use it to compare two options.*

### Teacher setup

- Print one card set and mat per pair. Each card shows a total and a number of units.
- Players each find a unit rate; the lower price (or faster rate) wins the round.
- Every answer must include a label.

### Materials

Shopping/rate cards, Unit-rate mat, Comparison symbols, Pencil.

### Differentiation & language support

- Unit-rate mat:  $\text{total} \div \text{units} = \text{rate}$  (SPED).
- Sentence stem: “The unit rate is \_\_\_\_ per \_\_\_\_.”
- ESOL: keep the unit word visible (per pound, per hour).

**Key vocabulary (English / Español):**

| Term      | Español       | What it means                         |
|-----------|---------------|---------------------------------------|
| rate      | tasa          | a ratio comparing two different units |
| unit rate | tasa unitaria | a rate for exactly one unit           |

**Quick teacher check:** *Ask a pair to show the division on Card 3 (180 miles in 3 hours).*

# Unit Rate Shopping War

Unit 4: Arcade Builder · Lesson 4-1 · EduWonderLab

Name: \_\_\_\_\_

Date: \_\_\_\_\_

Class: \_\_\_\_\_

**Your goal:** *I can find a unit rate and use it to compare two options.*

## What you need

Rate cards, Unit-rate mat.

## How to play

1. Each player flips a card and finds the unit rate.
2. Write the rate with its label.
3. Compare the two rates. Lowest price or fastest rate wins.
4. Keep score across the rounds.

## Rate Cards

Find the unit rate on each card by dividing. Compare to decide the winner.

|                                     |                                       |
|-------------------------------------|---------------------------------------|
| 1. 4 apples for \$2.00. Unit rate?  | 2. 6 sodas for \$3.60. Unit rate?     |
| 3. 180 miles in 3 hours. Unit rate? | 4. 250 words in 5 minutes. Unit rate? |
| 5. \$12.00 for 3 pounds. Unit rate? | 6. 8 pencils for \$1.60. Unit rate?   |
| 7. 360 km in 4 hours. Unit rate?    | 8. 15 cookies for \$4.50. Unit rate?  |

**Record your work (total ÷ units = rate):**

---

---

---

---

---

## Explain your thinking

Explain how a unit rate is different from a rate like “180 miles in 3 hours.”

**Sentence frame:** *The unit rate is \_\_\_ per \_\_\_ because I divided \_\_\_ by \_\_\_.*

★ **Challenge:** Cards 1 and 8 are both prices. If you had \$6.00, how many of each could you buy?

# ANSWER KEY

Teacher copy — please do not distribute to students.

## UNIT 4 • LESSON 4-1 • Unit Rate Shopping War

Standard 6.RP.2

### Answers

|                                                                                |                                                                                    |
|--------------------------------------------------------------------------------|------------------------------------------------------------------------------------|
| <b>1.</b> 4 apples for \$2.00. Unit rate?<br><b>Answer:</b> \$0.50 per apple   | <b>2.</b> 6 sodas for \$3.60. Unit rate?<br><b>Answer:</b> \$0.60 per soda         |
| <b>3.</b> 180 miles in 3 hours. Unit rate?<br><b>Answer:</b> 60 miles per hour | <b>4.</b> 250 words in 5 minutes. Unit rate?<br><b>Answer:</b> 50 words per minute |
| <b>5.</b> \$12.00 for 3 pounds. Unit rate?<br><b>Answer:</b> \$4.00 per pound  | <b>6.</b> 8 pencils for \$1.60. Unit rate?<br><b>Answer:</b> \$0.20 per pencil     |
| <b>7.</b> 360 km in 4 hours. Unit rate?<br><b>Answer:</b> 90 km per hour       | <b>8.</b> 15 cookies for \$4.50. Unit rate?<br><b>Answer:</b> \$0.30 per cookie    |

### Teaching notes & look-fors

- A unit rate always has a denominator of 1.
- Challenge: \$6 buys 12 apples (\$0.50) or 20 cookies (\$0.30).
