

Multiple Race Track

Unit 1: Number System Launch • Lesson 1-3 • EduWonderLab

UNIT 1 • LESSON 1-3 • TEACHER NOTES

Standard 6.NS.4

FORMAT Partner number-line race

TIME 20–25 min

GROUPING Pairs

TOPIC Least Common Multiple

STANDARD 6.NS.4

PREP LEVEL Light — print race-track strips and number-pair cards

Learning goal *I can find the least common multiple of two numbers by listing multiples.*

Teacher setup

- Print one race-track strip and one card set per pair.
- Each number in a pair gets its own color. Players mark multiples down the track.
- The first spot where both colors land is the LCM.

Materials

Race-track strips (0–60), Number-pair cards, Two-color counters or pencils, Pencil.

Differentiation & language support

- Skip-counting chart available for students still building fluency (SPED).
- Sentence stem: “The LCM is ___ because it is the first multiple ___ and ___ both reach.”
- ESOL: say each multiple aloud while marking (“six, twelve, eighteen...”).

Key vocabulary (English / Español):

Term	Español	What it means
multiple	múltiplo	the product of a number and a whole number
least common multiple	mínimo común múltiplo	the smallest multiple two numbers share

Quick teacher check: *Have a pair show the first shared landing spot on the track.*

Multiple Race Track

Unit 1: Number System Launch · Lesson 1-3 · EduWonderLab

Name: _____

Date: _____

Class: _____

Your goal: *I can find the least common multiple of two numbers by listing multiples.*

What you need

Race-track strip, Number-pair cards, Two colored pencils.

How to play

1. Flip a card. Mark multiples of the first number in color 1 along the track.
2. Mark multiples of the second number in color 2.
3. Find the first spot both colors land on. That number is the LCM.
4. Write the LCM and check it with your partner before flipping the next card.

Number-Pair Cards

Mark the multiples of each number on the track. The first shared landing spot is the LCM.

1. 4 and 6	2. 3 and 5
3. 6 and 8	4. 4 and 10
5. 5 and 6	6. 8 and 12
7. 9 and 6	8. 10 and 15
9. 7 and 4	10. 12 and 9

Record your work (list a few multiples of each number):

Explain your thinking

Explain the difference between a common multiple and the least common multiple.

Sentence frame: *The LCM of ___ and ___ is ___ because it is the first number both multiples land on.*

★ **Challenge:** When is the LCM of two numbers just their product? Find an example and a non-example.

ANSWER KEY

Teacher copy — please do not distribute to students.

UNIT 1 • LESSON 1-3 • Multiple Race Track

Standard 6.NS.4

Answers

1. 4 and 6 Answer: 12	2. 3 and 5 Answer: 15
3. 6 and 8 Answer: 24	4. 4 and 10 Answer: 20
5. 5 and 6 Answer: 30	6. 8 and 12 Answer: 24
7. 9 and 6 Answer: 18	8. 10 and 15 Answer: 30
9. 7 and 4 Answer: 28	10. 12 and 9 Answer: 36

Teaching notes & look-fors

- Challenge: LCM equals the product when numbers share no common factor (e.g., 3 and 5 → 15). For 6 and 8, LCM 24 ≠ 48.
