UNIT 2 • STANDARD 6.NOS.1

# Divide Fractions

Lesson 2-3 • Teacher Copy

**Name:** \_\_\_\_\_

**Date:** \_\_\_\_\_

**Class:** \_\_\_\_\_

## My Notes

Level 3 Enrichment

### TODAY'S OBJECTIVES

**Content Objective:** I can divide a fraction by a fraction by multiplying by the reciprocal and simplifying.

**Language Objective:** I can explain my steps using the words dividend, divisor, reciprocal, quotient, and simplify.

See **Learn It** for the explanation and worked examples, and the **Vocab** tab for the words. These are your notes to fill in and keep.

Fill in each blank as we go. Use the Word Bank to help you.

### WORD BANK — FILL EACH BLANK WITH THE BEST WORD

Dividend

Divisor

Reciprocal

Quotient

Simplify

Tap any word to see what it means and a picture.

Level 3: try the blanks from memory first, then check the bank.

1 In  $3/4 \div 1/2$ , the fraction  $3/4$  being divided is the .

2 In  $3/4 \div 1/2$ , the fraction  $1/2$  we divide by is the .

3 To divide by  $1/2$ , I multiply by its , which is 2.

4 The answer to a division problem is the .

5 Writing a fraction in its smallest equal form, like  $4/8 = 1/2$ , is to

it.

## Write About the Math

### Guided ESOL writing

Use the support level you need. Every level answers the same math question.

### 1. Understand the Question

#### EXPLAIN

**Why do we multiply by the reciprocal when we divide one fraction by another?**

**Your job:** Answer the question. Use math evidence. Explain how the evidence proves your answer.

*Responde la pregunta. Usa evidencia matemática. Explica cómo la evidencia demuestra tu respuesta.*

### 2. Plan Your Math Words

Check at least two words you will use.

☐

**Divisor** — The number you split by in a division problem.

*Divisor — El número entre el que divides en una división.*

☐

**Reciprocal** — A fraction turned upside down.

*Recíproco — Una fracción volteada de arriba abajo.*

☐

**Quotient** — The answer when you divide.

*Cociente — La respuesta cuando divides.*

☐

**Simplify** — To make a fraction smaller using the same parts, like  $2/4 = 1/2$ .

*Simplificar — Hacer una fracción más pequeña con las mismas partes, como  $2/4 = 1/2$ .*

☐

**Dividend** — The number you are splitting up in a division problem.

*Dividendo — El número que estás repartiendo en una división.*

**Say it first:** Say your idea to a partner or quietly to yourself before you write.

*Di tu idea a un compañero o en voz baja antes de escribir.*

**I flipped the divisor to its reciprocal because \_\_\_\_.**

*Volteé el divisor a su recíproco porque \_\_\_\_.*

### 3. Build Your Explanation

**Model the parts:** This model shows the parts of an explanation. It does not answer your writing question.

**Claim:** She will get many portions because  $\frac{1}{8}$  pound is much smaller than  $\frac{3}{4}$  pound.

**Evidence:** Students recognize the divisor  $\frac{1}{8}$  is smaller than the dividend  $\frac{3}{4}$ , so the quotient is greater than 1.

**Reasoning:** This evidence connects the definition of dividend to the mathematical claim.

#### Start

Most language support

Complete the frames. Use the word bank.

*Completa las oraciones. Usa el banco de palabras.*

- **I flipped the divisor to its reciprocal because \_\_\_\_.**

*Volteé el divisor a su recíproco porque \_\_\_\_.*

- **After Keep, Change, Flip the answer is \_\_\_\_.**

*Después de Mantener, Cambiar, Voltear la respuesta es \_\_\_\_.*

---

---

---

---

#### Build

Some language support

Write two connected sentences. Use because, so, or but.

*Escribe dos oraciones conectadas. Usa porque, entonces o pero.*

- **My claim is \_\_\_\_.**

*Mi afirmación es \_\_\_\_.*

- **I know because \_\_\_\_.**

*Lo sé porque \_\_\_\_.*

- **So \_\_\_\_.**

*Entonces \_\_\_\_.*

---

---

---

---

## Explain

### Light language support

Write a claim, give math evidence, and explain your reasoning.

*Escribe una afirmación, da evidencia matemática y explica tu razonamiento.*

- **My claim is \_\_\_\_.**  
*Mi afirmación es \_\_\_\_.*
- **My math evidence is \_\_\_\_.**  
*Mi evidencia matemática es \_\_\_\_.*
- **This proves \_\_\_\_ because \_\_\_\_.**  
*Esto demuestra \_\_\_\_ porque \_\_\_\_.*

---

---

---

---

---

---

## 4. Check Your Explanation

- ☐ I answered the question.  
*Respondí la pregunta.*

- ☐ I used math evidence: numbers, an equation, a model, or a comparison.  
*Usé evidencia matemática: números, una ecuación, un modelo o una comparación.*

- ☐ I explained how the evidence proves my answer.  
*Explicué cómo la evidencia demuestra mi respuesta.*

- ☐ I used at least two math words.  
*Usé por lo menos dos palabras matemáticas.*

- ☐ I reread complete sentences and punctuation.  
*Volví a leer mis oraciones completas y la puntuación.*

---

## Writing Guide — Teacher Copy

The support level changes the amount of language scaffolding, not the mathematical expectation. Look for the same five features in every response.

- I answered the question.
- I used math evidence: numbers, an equation, a model, or a comparison.
- I explained how the evidence proves my answer.
- I used at least two math words.
- I reread complete sentences and punctuation.

---

## Answer Key & Teacher Guide

1. **Notes 1:** Dividend
2. **Notes 2:** Divisor
3. **Notes 3:** Reciprocal
4. **Notes 4:** Quotient
5. **Notes 5:** Simplify
6. **Watch for this mistake:** *A common mistake in Divide Fractions is flipping the wrong fraction: students flip the dividend (the first fraction) instead of the divisor (the second fraction). For example, solving  $3/4 \div 5/8$  by flipping  $3/4$  to  $4/3$  and keeping  $5/8$  gives  $4/3 \times 5/8 = 20/24 = 5/6$  — but only the divisor gets flipped. Keep  $3/4$ , change  $\div$  to  $\times$ , and flip only the divisor  $5/8$  to its reciprocal  $8/5$ :  $3/4 \times 8/5 = 24/20 = 6/5$ . Before you submit, check that the fraction you kept (the dividend) is still facing the same way it started.*
7. **Try It 1:** A.  $4 - (2/3) \div (1/6) = (2/3) \times (6/1) = 12/3 = 4$ . The dial unlocks at 4.
8. **Try It 2:** A.  $3/2 - (3/4) \div (1/2) = (3/4) \times (2/1) = 6/4 = 3/2$ . The keypad accepts  $3/2$ .
