

Expression Substitution Menu

Unit 6: Music Studio · Lesson 6-2 · EduWonderLab

UNIT 6 · LESSON 6-2 · TEACHER NOTES

Standard 6.EE.2c

FORMAT Menu substitution game	TIME 25–30 min
GROUPING Pairs	TOPIC Evaluate Expressions
STANDARD 6.EE.2c	PREP LEVEL Light — print expression menu and value cards

Learning goal *I can evaluate an expression by substituting a value for the variable.*

Teacher setup

- Print one menu and value-card set per pair.
- Students pick an expression and a value, substitute, then evaluate.
- Partners verify the substitution before any arithmetic.

Materials

Expression menu, Value cards, Substitution boxes, Pencil.

Differentiation & language support

- Substitution box shows “replace the variable first” (SPED).
- Sentence stem: “First I replaced ___ with ___.”
- ESOL: read the expression aloud before substituting.

Key vocabulary (English / Español):

Term	Español	What it means
variable	variable	a letter that stands for a number
substitute	sustituir	to replace the variable with a value
evaluate	evaluar	to find the value

Quick teacher check: *Ask a pair to show the substitution step for Card 4 before they multiply.*

Expression Substitution Menu

Unit 6: Music Studio · Lesson 6-2 · EduWonderLab

Name: _____

Date: _____

Class: _____

Your goal: *I can evaluate an expression by substituting a value for the variable.*

What you need

Expression menu, Value cards.

How to play

1. Pick an expression and a value card.
2. Substitute the value for the variable.
3. Evaluate using the order of operations.
4. Have your partner check the substitution.

Menu Items

Replace the variable with the value first, then follow the order of operations.

1. $3x + 2$, when $x = 4$	2. $2a - 5$, when $a = 6$
3. x^2 , when $x = 5$	4. $4(n + 1)$, when $n = 3$
5. $5y - y$, when $y = 2$	6. $12 \div p$, when $p = 3$
7. $2x + 3y$, when $x = 2$ and $y = 4$	8. $m^2 + 1$, when $m = 4$
9. $3(b - 2)$, when $b = 7$	10. $10 - 2k$, when $k = 3$

Record your work (substitute, then evaluate):

Explain your thinking

Explain why you substitute the value before you do any arithmetic.

Sentence frame: *First I replaced ___ with ___, then I ___.*

★ **Challenge:** Card 3 and Card 8 both use a square. Evaluate $x^2 + 1$ when $x = 6$. (37)

ANSWER KEY

Teacher copy — please do not distribute to students.

UNIT 6 • LESSON 6-2 • Expression Substitution Menu

Standard 6.EE.2c

Answers

1. $3x + 2$, when $x = 4$ Answer: 14	2. $2a - 5$, when $a = 6$ Answer: 7
3. x^2 , when $x = 5$ Answer: 25	4. $4(n + 1)$, when $n = 3$ Answer: 16
5. $5y - y$, when $y = 2$ Answer: 8	6. $12 \div p$, when $p = 3$ Answer: 4
7. $2x + 3y$, when $x = 2$ and $y = 4$ Answer: 16	8. $m^2 + 1$, when $m = 4$ Answer: 17
9. $3(b - 2)$, when $b = 7$ Answer: 15	10. $10 - 2k$, when $k = 3$ Answer: 4

Teaching notes & look-fors

- Substitute first, then follow order of operations.
- Card 8: $m^2 + 1$ with $m = 4 \rightarrow 16 + 1 = 17$.
