

Four-Quadrant Battleship

Unit 9: Treasure Map Navigator · Lesson 9-5 · EduWonderLab

UNIT 9 · LESSON 9-5 · TEACHER NOTES

Standard 6.NS.6b

FORMAT Coordinate strategy game

TIME 25–35 min

GROUPING Pairs

TOPIC Ordered Pairs in All Four Quadrants

STANDARD 6.NS.6b

PREP LEVEL Light — print four-quadrant grids

Learning goal *I can name the quadrant of an ordered pair in all four quadrants.*

Teacher setup

- Print two grids per pair. Players secretly place ships and call ordered pairs.
- Each hit must be recorded with the correct quadrant.
- Use the cards to practice naming quadrants first.

Materials

Four-quadrant coordinate grids, Ship markers, Ordered-pair recording sheet, Pencil.

Differentiation & language support

- Quadrant reminder: I (+,+), II (-,+), III (-,-), IV (+,-) (SPED).
- Sentence stem: “The point is in Quadrant ____ because ____.”
- ESOL: color the four quadrants on a reference grid.

Key vocabulary (English / Español):

Term	Español	What it means
quadrant	cuadrante	one of the four regions of the plane
axis	eje	the horizontal or vertical line of the grid

Quick teacher check: *Check Cards 5 and 6 — points on an axis have no quadrant.*

Four-Quadrant Battleship

Unit 9: Treasure Map Navigator · Lesson 9-5 · EduWonderLab

Name: _____ Date: _____ Class: _____

Your goal: *I can name the quadrant of an ordered pair in all four quadrants.*

What you need

Coordinate grids, Ship markers, Recording sheet.

How to play

1. Plot the ordered pair on your grid.
2. Check the signs of x and y .
3. Name the quadrant (or the axis if a coordinate is 0).
4. Record the point and its quadrant.

Quadrant Cards

Use the signs of x and y to name the quadrant: I $(+,+)$, II $(-,+)$, III $(-,-)$, IV $(+,-)$.

1. $(3, 4)$	2. $(-2, 5)$
3. $(-4, -3)$	4. $(5, -1)$
5. $(0, 3)$	6. $(-6, 0)$
7. $(2, -7)$	8. $(-3, 2)$

Record your work (point + quadrant):

Explain your thinking

Explain how the signs of x and y tell you the quadrant.

Sentence frame: *The point is in Quadrant ___ because x is ___ and y is ___.*

★ **Challenge:** Name a point in each quadrant that is exactly 5 units from the origin along an axis.

ANSWER KEY

Teacher copy — please do not distribute to students.

UNIT 9 • LESSON 9-5 • Four-Quadrant Battleship

Standard 6.NS.6b

Answers

1. (3, 4) Answer: Quadrant I	2. (-2, 5) Answer: Quadrant II
3. (-4, -3) Answer: Quadrant III	4. (5, -1) Answer: Quadrant IV
5. (0, 3) Answer: On the y-axis (no quadrant)	6. (-6, 0) Answer: On the x-axis (no quadrant)
7. (2, -7) Answer: Quadrant IV	8. (-3, 2) Answer: Quadrant II

Teaching notes & look-fors

- Quadrants by sign: I (+,+), II (-,+), III (-,-), IV (+,-).
- A point with a 0 coordinate lies on an axis, not in a quadrant.
