UNIT 7 • STANDARD 6.AT.8

# Equations and Inequalities Problem Solving

Lesson 7-7 • Teacher Copy

**Name:** \_\_\_\_\_

**Date:** \_\_\_\_\_

**Class:** \_\_\_\_\_

## My Notes

Level 1 Support

### TODAY'S OBJECTIVES

**Content Objective:** I can model and solve real-world problems using equations and inequalities.

**Language Objective:** I can explain my reasoning using the words model, equation, inequality, and reasonableness.

See **Learn It** for the explanation and worked examples, and the **Vocab** tab for the words. These are your notes to fill in and keep.

**Fill in each blank as we go. Use the Word Bank to help you.**

### WORD BANK — FILL EACH BLANK WITH THE BEST WORD

Model

Equation

Inequality

Reasonableness

Variable

Constraint

Tap any word to see what it means and a picture.

1

A drawing, equation, or diagram that represents a situation is a

2

A math sentence with an equal sign is an .

3

A math sentence that compares values with  $<$ ,  $>$ ,  $\leq$ , or  $\geq$  is an

4

Checking whether an answer makes sense for the problem is checking its

5

A letter that stands for the unknown amount in a problem is a

- 6 A limit that tells which values are allowed in a problem is a

## Write About the Math

Guided ESOL writing

Use the support level you need. Every level answers the same math question.

### 1. Understand the Question

EXPLAIN

**What was your plan to solve this problem, and how did you check that your answer was reasonable?**

**Your job:** Answer the question. Use math evidence. Explain how the evidence proves your answer.

*Responde la pregunta. Usa evidencia matemática. Explica cómo la evidencia demuestra tu respuesta.*

## 2. Plan Your Math Words

Check at least two words you will use.

- ☐ **Model** — To show a real-life situation with an equation or inequality.  
*Modelar — Mostrar una situación real con una ecuación o desigualdad.*

- ☐ **Equation** — A math sentence with an equal sign showing both sides are the same.  
*Ecuación — Una oración matemática con un signo igual que muestra que ambos lados son iguales.*

- ☐ **Inequality** — A math sentence that compares two sides with  $<$ ,  $>$ ,  $\leq$ , or  $\geq$ .  
*Desigualdad — Una oración matemática que compara dos lados con  $<$ ,  $>$ ,  $\leq$  o  $\geq$ .*

- ☐ **Reasonableness** — Checking if your answer makes sense.  
*Razonabilidad — Revisar si tu respuesta tiene sentido.*

- ☐ **Variable** — A letter that stands for the unknown amount in a word problem.  
*Variable — Una letra que representa la cantidad desconocida en un problema verbal.*

**Say it first:** Say your idea to a partner or quietly to yourself before you write.

*Di tu idea a un compañero o en voz baja antes de escribir.*

**My plan was to \_\_\_\_\_, and I knew to \_\_\_\_\_ because \_\_\_\_\_.**

*Mi plan fue \_\_\_\_\_, y supe \_\_\_\_\_ porque \_\_\_\_\_.*

### 3. Build Your Explanation

**Model the parts:** This model shows the parts of an explanation. It does not answer your writing question.

**Claim:** An exact total points to an equation; a limit or range points to an inequality.

**Evidence:** Students use signal words ('equals/total' for an equation; 'at least/at most/no more than' for an inequality) to choose the correct model.

**Reasoning:** This evidence connects the definition of equation to the mathematical claim.

#### Start

Most language support

Complete the frames. Use the word bank.

*Completa las oraciones. Usa el banco de palabras.*

- **My plan was to \_\_\_\_ , and I knew to \_\_\_\_ because \_\_\_\_ .**

*Mi plan fue \_\_\_\_ , y supe \_\_\_\_ porque \_\_\_\_ .*

- **My answer is reasonable because \_\_\_\_ .**

*Mi respuesta es razonable porque \_\_\_\_ .*

#### Build

Some language support

Write two connected sentences. Use because, so, or but.

*Escribe dos oraciones conectadas. Usa porque, entonces o pero.*

- **My claim is \_\_\_\_ .**

*Mi afirmación es \_\_\_\_ .*

- **I know because \_\_\_\_ .**

*Lo sé porque \_\_\_\_ .*

- **So \_\_\_\_ .**

*Entonces \_\_\_\_ .*

## Explain

### Light language support

Write a claim, give math evidence, and explain your reasoning.

*Escribe una afirmación, da evidencia matemática y explica tu razonamiento.*

- **My claim is \_\_\_\_.**  
*Mi afirmación es \_\_\_\_.*
- **My math evidence is \_\_\_\_.**  
*Mi evidencia matemática es \_\_\_\_.*
- **This proves \_\_\_\_ because \_\_\_\_.**  
*Esto demuestra \_\_\_\_ porque \_\_\_\_.*

---

---

---

---

---

## 4. Check Your Explanation

- ☐ I answered the question.  
*Respondí la pregunta.*

- ☐ I used math evidence: numbers, an equation, a model, or a comparison.  
*Usé evidencia matemática: números, una ecuación, un modelo o una comparación.*

- ☐ I explained how the evidence proves my answer.  
*Explicué cómo la evidencia demuestra mi respuesta.*

- ☐ I used at least two math words.  
*Usé por lo menos dos palabras matemáticas.*

- ☐ I reread complete sentences and punctuation.  
*Volví a leer mis oraciones completas y la puntuación.*

---

## Writing Guide — Teacher Copy

The support level changes the amount of language scaffolding, not the mathematical expectation. Look for the same five features in every response.

- I answered the question.
- I used math evidence: numbers, an equation, a model, or a comparison.
- I explained how the evidence proves my answer.
- I used at least two math words.
- I reread complete sentences and punctuation.

---

## Answer Key & Teacher Guide

1. **Notes 1:** Model
2. **Notes 2:** Equation
3. **Notes 3:** Inequality
4. **Notes 4:** Reasonableness
5. **Notes 5:** Variable
6. **Notes 6:** Constraint
7. **Watch for this mistake:** *A common mistake in Equations and Inequalities Problem Solving is matching the wrong model to a key phrase. For 'the getaway car held no more than 6 bags,' students often write the equation  $b = 6$  instead of the inequality  $b \leq 6$ , because they see one number and assume it must be exact. The same mistake happens in reverse: for 'the reward split equally among 5 people gave each \$40,' students sometimes write the inequality  $5p \geq 40$  instead of the equation  $5p = 40$ , because 'split equally' sounds like it could mean a range. Before you submit, ask: does this phrase give one exact value (equation,  $=$ ) or a limit/range (inequality,  $<$ ,  $>$ ,  $\leq$ ,  $\geq$ )?*
8. **Try It 1:** A.  $x \leq 20$  — 'At most 20' means 20 or fewer, so  $x \leq 20$ .
9. **Try It 2:** A.  $w = 12$  — Divide both sides by 5:  $w = 60 \div 5 = 12$  pounds. Check:  $5 \times 12 = 60$  ✓
