UNIT 1 • STANDARD 6.NOS.3

Add and Subtract Decimals

Lesson 1-5 • Teacher Copy

Name: _____

Date: _____

Class: _____

TODAY'S OBJECTIVES

Content Objective: I can add and subtract decimals by lining up the place values and the decimal points.

Language Objective: I can explain my steps using the words decimal, place value, tenths, hundredths, and annex zeros.

See **Learn It** for the explanation and worked examples, and the **Vocab** tab for the words. These are your notes to fill in and keep.

Fill in each blank as we go. Use the Word Bank to help you.

WORD BANK — FILL EACH BLANK WITH THE BEST WORD

Decimal

Place value

Tenths

Hundredths

Annex zeros

Tap any word to see what it means and a picture.

Level 3: try the blanks from memory first, then check the bank.

1

A number that uses a point to show a value less than one whole is a

2

The value a digit has based on its position in a number is its

3

The first place to the right of the decimal point is the
place.

4

The second place to the right of the decimal point is the
place.

5

Writing extra zeros at the end of a decimal so the places line up is called

Write About the Math

Guided ESOL writing

Use the support level you need. Every level answers the same math question.

1. Understand the Question

EXPLAIN

When you added 128.75 and 46.8, how did you handle 46.8 having fewer decimal places, and when did you need to regroup?

Your job: Answer the question. Use math evidence. Explain how the evidence proves your answer.

Responde la pregunta. Usa evidencia matemática. Explica cómo la evidencia demuestra tu respuesta.

2. Plan Your Math Words

Check at least two words you will use.

☐ **Decimal** — A number with a dot that shows a part between whole numbers.
Decimal — Un número con un punto que muestra una parte entre números enteros.

☐ **Place value** — What a digit is worth based on where it sits in a number.
Valor posicional — Lo que vale un dígito según el lugar que ocupa en el número.

☐ **Tenths** — The first spot after the decimal point. It shows parts out of 10.
Décimas — El primer lugar después del punto decimal. Muestra partes de 10.

☐ **Hundredths** — The second spot after the decimal point. It shows parts out of 100.
Centésimas — El segundo lugar después del punto decimal. Muestra partes de 100.

☐ **Annex zeros** — Adding zeros at the end of a decimal so numbers line up evenly.
Agregar ceros — Agregar ceros al final de un decimal para que los números se alineen.

Say it first: Say your idea to a partner or quietly to yourself before you write.

Di tu idea a un compañero o en voz baja antes de escribir.

I annexed a zero to write 46.8 as ____ so the place values matched.

Agregué un cero para escribir 46.8 como ____ para que los valores posicionales coincidieran.

3. Build Your Explanation

Model the parts: This model shows the parts of an explanation. It does not answer your writing question.

Claim: Lining up the decimal points keeps each place value matched.

Evidence: Students explain that aligning decimal points lines up matching place values (tenths under tenths, hundredths under hundredths) so the addition and subtraction are correct.

Reasoning: This evidence connects the definition of decimal to the mathematical claim.

Start

Most language support

Complete the frames. Use the word bank.

Completa las oraciones. Usa el banco de palabras.

- **I annexed a zero to write 46.8 as ____ so the place values matched.**
Agregué un cero para escribir 46.8 como ____ para que los valores posicionales coincidieran.
- **I had to regroup when ____.**
Tuve que reagrupar cuando ____.

Build

Some language support

Write two connected sentences. Use because, so, or but.

Escribe dos oraciones conectadas. Usa porque, entonces o pero.

- **My claim is ____.**
Mi afirmación es ____.
- **I know because ____.**
Lo sé porque ____.
- **So ____.**
Entonces ____.

Explain

Light language support

Write a claim, give math evidence, and explain your reasoning.

Escribe una afirmación, da evidencia matemática y explica tu razonamiento.

- **My claim is ____.**
Mi afirmación es ____.
- **My math evidence is ____.**
Mi evidencia matemática es ____.
- **This proves ____ because ____.**
Esto demuestra ____ porque ____.

4. Check Your Explanation

- ☐ I answered the question.
Respondí la pregunta.

- ☐ I used math evidence: numbers, an equation, a model, or a comparison.
Usé evidencia matemática: números, una ecuación, un modelo o una comparación.

- ☐ I explained how the evidence proves my answer.
Explicué cómo la evidencia demuestra mi respuesta.

- ☐ I used at least two math words.
Usé por lo menos dos palabras matemáticas.

- ☐ I reread complete sentences and punctuation.
Volví a leer mis oraciones completas y la puntuación.

Writing Guide — Teacher Copy

The support level changes the amount of language scaffolding, not the mathematical expectation. Look for the same five features in every response.

- I answered the question.
- I used math evidence: numbers, an equation, a model, or a comparison.
- I explained how the evidence proves my answer.
- I used at least two math words.
- I reread complete sentences and punctuation.

Answer Key & Teacher Guide

1. **Notes 1:** Decimal
2. **Notes 2:** Place value
3. **Notes 3:** Tenths
4. **Notes 4:** Hundredths
5. **Notes 5:** Annex zeros
6. **Watch for this mistake:** *A common mistake in Add and Subtract Decimals is lining up the last digits (the right edges) of each number instead of lining up the decimal points — for example, adding 8.3 and 2.45 as if the 3 and the 5 belong in the same column. Before you add or subtract, annex zeros so every number has the same number of decimal places (write 8.3 as 8.30), then check that the decimal points sit directly above one another.*
7. **Try It 1:** A. 4.85 — *Annex a zero so 9.6 becomes 9.60, then subtract: $9.60 - 4.75 = 4.85$ units. Borrow in the hundredths and tenths places to subtract correctly.*
8. **Try It 2:** A. \$16.73 — *Write $48.00 - 31.27$ with points lined up. Hundredths: $0 - 7 \rightarrow$ borrow $\rightarrow 10 - 7 = 3$. Tenths: $9 - 2 = 7$ (after borrowing). Ones: $7 - 1 = 6$. Tens: $4 - 3 = 1$. Answer: \$16.73.*
