Convert Measurement Units

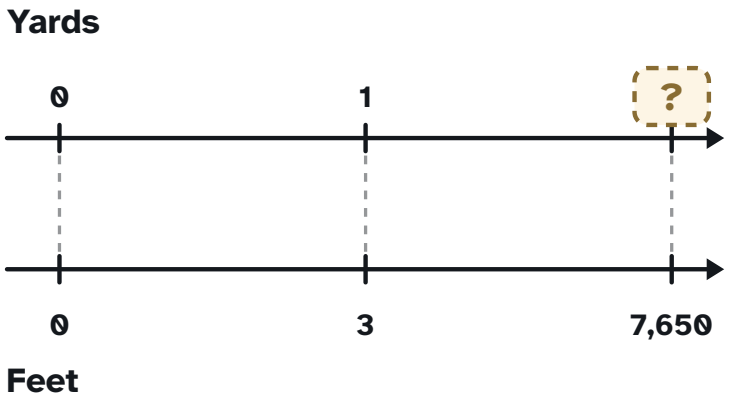

Choose whether to multiply or divide when you change customary units.

Name _____ **Date** _____

Tonight's spark

A flour sack says 96 ounces. The bakery orders by the pound, and 1 pound = 16 ounces. How many pounds of flour are in the sack?

Make a guess first: will the answer be more than 96, or less?

Our class model: bigger unit, fewer; smaller unit, more

Try it

Work it out on paper. Write one answer on each line.

1 **You change 18 feet to yards, and 1 yard = 3 feet. Which is correct?**

A. Multiply, because yards are smaller **B.** Divide, because yards are bigger
C. Multiply, because yards are bigger **D.** Divide, because yards are smaller

My answer _____

2 **Change 18 feet to yards.**

A. 54 **B.** 15 **C.** 6 **D.** 21

My answer _____

3 **Change 8 yards to feet.**

A. 2⅔ **B.** 5 **C.** 11 **D.** 24

My answer _____

4 **Change 64 ounces to pounds. (1 pound = 16 ounces)**

A. 4 **B.** 48 **C.** 80 **D.** 1,024

My answer _____

5 **Change 3 pounds to ounces. (1 pound = 16 ounces)**

A. 0.19 **B.** 19 **C.** 48 **D.** 13

My answer _____

6 **Convert 10,560 feet to miles. (1 mile = 5,280 feet)**

A. 15,840 **B.** 2 **C.** 5,280 **D.** 1

My answer _____

Talk about it

Are you changing to a smaller or a bigger unit, and will your answer be more or less than the starting number?

Home mission

Find a bag of flour, rice, or sugar with ounces on the label. Ask your student: how many ounces are in 3 pounds? If a bag says 64 ounces, how many pounds is that? Say "bigger or smaller?" before you calculate.

If we get stuck, ask

- Which unit is bigger — the one you have or the one you want?
- Will the number get bigger or smaller? Decide before you calculate.
- Can you multiply back to check?

Do it on a screen

Scan or type the link. Same lesson, with hints.
