

Bridge to Grade 6 Family Practice Pack

Short, low-prep practice routines families can use at home to strengthen Grade 6 readiness without turning evenings into a second school day.

Family Letter

Dear families,

Your student is building the skills that make Grade 6 math feel more manageable: decimal operations, fraction confidence, ratios, rates, percents, expressions, equations, coordinate reasoning, geometry, data, and multi-step problem solving.

Practice works best when it is short and consistent. Choose two or three activities each week. Encourage your student to explain how they know, estimate before calculating, and check whether an answer is reasonable.

Helpful sentence starters: "I noticed...", "I estimated first by...", "Another way to model this is...", "This answer makes sense because..."

Six-Week Choice Board

Complete at least three boxes per week. Students may repeat a favorite routine with new numbers.

Decimal Receipt

Add three prices from a receipt. Estimate first, then calculate exactly.

Fraction Kitchen

Double or halve a simple recipe fraction. Explain the operation.

Percent Hunt

Find a percent in an ad, store sign, or app. Tell what the percent means.

Unit Rate Talk

Compare two package sizes. Which is the better deal per item or per ounce?

Equation Story

Write a story that matches $x + 12 = 35$ or $4x = 28$. Solve it.

Coordinate Walk

Draw a coordinate grid. Plot four points that make a rectangle.

Area Around Us

Measure a rectangle at home. Find its area and perimeter.

Data Snapshot

Record five temperatures, scores, or times. Find the median and mean.

Error Detective

Create one wrong solution on purpose. Ask someone to find and fix it.

Weekly Home Checks

Week 1: Decimals

1. Compute: $18.45 + 6.7$.
2. Compute: $30 - 8.625$.
3. Which is greater: 4.09 or 4.9? Explain.

Week 2: Fractions

1. Compute: $\frac{2}{3} + \frac{1}{6}$.
2. Compute: $\frac{5}{8} - \frac{1}{4}$.
3. Draw or describe a model for $\frac{3}{4}$.

Week 3: Ratios and Percents

1. Write two equivalent ratios for 6:9.
2. Find the unit rate: 150 miles in 3 hours.
3. Find 20% of 65.

Week 4: Expressions and Equations

1. Evaluate $5n + 4$ when $n = 7$.
2. Solve: $y - 16 = 41$.
3. Write a real-life story for $3x + 5$.

Week 5: Geometry and Data

1. Find the area of a triangle with base 10 and height 6.
2. Find the volume of a box that is 3 by 5 by 8.
3. Find the median of 7, 12, 9, 20, 12.

Week 6: Mixed Readiness

1. A \$32 item is 25% off. What is the sale price?
2. A garden is 9.5 feet by 4 feet. What is the area?
3. Explain one strategy that helped you most during this bridge.

Practice Reflection

Week	Activities Completed	One Skill That Improved	Family Initials

Answer Key

Week 1	25.15; 21.375; 4.9 is greater because $4.90 > 4.09$.
Week 2	$\frac{5}{6}$; $\frac{3}{8}$; model should show 3 of 4 equal parts.
Week 3	Examples: 2:3 and 12:18; 50 miles per hour; 13.
Week 4	39; 57; stories vary.
Week 5	30 square units; 120 cubic units; 12.
Week 6	\$24; 38 square feet; reflections vary.
