

LESSON 2-2 • SESSION 1 • GUIDED NOTES

Building a Histogram

Learning target – I can group data into equal intervals and build a histogram from a frequency table. · 6.SP.B.4

WORDS TO KNOW*fill in the missing words*

WORD	WHAT IT MEANS	EXAMPLE
histogram <i>histograma</i>	A graph of _____ bars; each bar counts the values in one interval.	bars over 0-9, 10-19, 20-29
interval <i>intervalo</i>	A group of numbers, like 10-19. All intervals have the same _____.	10-19 holds 10 whole numbers
frequency <i>frecuencia</i>	_____ values land in one interval.	10-19: 3 values

KEY IDEA*complete each sentence*

- Intervals must be the same _____ and must not _____.
- The bar heights add up to the _____ number of values.

WORKED EXAMPLE*fill in the blanks as we solve*

Walk times (min): 4, 15, 9, 22, 11, 18, 27. Use 0-9, 10-19, 20-29.

Step 1 0-9 holds 4 and 9, so its frequency is ____.**Step 2** 10-19 holds 15, 11 and 18: frequency ____.**Step 3** 20-29 holds 22 and 27: frequency ____.**Answer Check:** $2 + 3 + 2 =$ ____ values**YOU TRY***use the example as a model***1.** Ages: 13, 27, 21, 8, 16, 24, 29, 18. Find each frequency.**a.** 0-9: ____**b.** 10-19: ____**c.** 20-29: ____**2.** A histogram shows 10 values. Two bars have heights 4 and 2. How tall is the third bar?**Height** _____**SUM IT UP***in your own words*

To build a histogram, I first _____, then _____.

LESSON 2-2 • SESSION 2 • GUIDED NOTES

Describing Histogram Shape

Learning target – I can describe the shape of a histogram using its peak, spread, and balance. • 6.SP.B.4

WORDS TO KNOW*fill in the missing words*

WORD	WHAT IT MEANS	EXAMPLE
peak <i>pico</i>	The interval with the _____ bar.	bars 2, 7, 3: peak is the middle bar
symmetric <i>simétrico</i>	The left and right sides _____.	1, 4, 8, 4, 1
skewed right <i>sesgado a la derecha</i>	The long _____ stretches to the right.	9, 5, 2, 1, 1
skewed left <i>sesgado a la izquierda</i>	The long tail stretches to the _____.	1, 2, 3, 6, 8

KEY IDEA*complete each sentence*

- The _____ shows where a typical value falls.
- Name a skewed shape for its _____, not for where the tall bars are.

WORKED EXAMPLE*fill in the blanks as we solve*

Bars of height 1, 3, 6, 9 sit over 0–9, 10–19, 20–29, 30–39. Describe the shape.

Step 1 The tallest bar, 9, is over _____, so that is the peak.**Step 2** The bars shrink toward the _____, so the tail is on the left.**Answer** The shape is _____.**YOU TRY***use the example as a model***1.** Bar heights from left to right. Name each shape.**a.** 2, 5, 9, 5, 2 _____**b.** 10, 6, 3, 2, 1 _____**2.** Bars of 3, 8, 4 sit over 60–69, 70–79, 80–89. Name the peak and the number of values.**Peak; values** _____**SUM IT UP***in your own words*

A histogram is skewed right when _____ because _____.
