

**LESSON 2-7 • SESSION 1 • GUIDED NOTES**

# Dividing a Decimal by a Whole Number

Learning target – I can divide a decimal by a whole number and place the decimal point correctly. • 6.NS.B.3

**WORDS TO KNOW***fill in the missing words*

| WORD                                          | WHAT IT MEANS                                                | EXAMPLE                       |
|-----------------------------------------------|--------------------------------------------------------------|-------------------------------|
| <b>dividend</b><br><i>dividendo</i>           | The number being _____; the amount you share.                | In $84.6 \div 6$ , it is 84.6 |
| <b>divisor</b><br><i>divisor</i>              | The number you _____ by.                                     | In $84.6 \div 6$ , it is 6    |
| <b>quotient</b><br><i>cociente</i>            | The _____ to a division problem.                             | $84.6 \div 6 = 14.1$          |
| <b>annex a zero</b><br><i>agregar un cero</i> | Write a 0 at the end of a decimal; the _____ stays the same. | $7.2 = 7.20$                  |

**KEY IDEA***complete each sentence*

- Put the decimal point in the quotient straight \_\_\_\_\_ the point in the dividend.
- If an amount is left over, \_\_\_\_\_ a zero and keep dividing.
- Check: quotient  $\times$  divisor = \_\_\_\_\_.

**WORKED EXAMPLE***fill in the blanks as we solve*

A rope 25.2 meters long is cut into 6 equal pieces. How long is each piece?

**Step 1** Write  $25.2 \div 6$  and put the point in the quotient straight \_\_\_\_\_ the point in 25.2.**Step 2** 6 goes into 25 \_\_\_\_\_ times with 1 left over. Bring down the 2 to make 12.**Step 3**  $12 \div 6 = \underline{\quad}$ , so the quotient is 4.2.**Answer** Each piece is \_\_\_\_\_ m. **Check:**  $4.2 \times 6 = 25.2$ **YOU TRY***use the example as a model***1.** Find each quotient.

**a.**  $8.4 \div 4 = \underline{\quad}$

**b.**  $13.5 \div 5 = \underline{\quad}$

**c.**  $7.5 \div 2 = \underline{\quad}$

**2.** Four friends share a \$9.60 bill equally. How much does each pay?*Show your work.***Answer** \_\_\_\_\_ dollars**SUM IT UP***in your own words*

To divide a decimal by a whole number, I place the decimal point \_\_\_\_\_ because \_\_\_\_\_.

---

---

**LESSON 2-7 • SESSION 2 • GUIDED NOTES**

# Dividing by a Decimal

Learning target – I can divide by a decimal by making the divisor a whole number first. • 6.NS.B.3

**WORDS TO KNOW***fill in the missing words*

| WORD                                                      | WHAT IT MEANS                                             | EXAMPLE                       |
|-----------------------------------------------------------|-----------------------------------------------------------|-------------------------------|
| <b>divisor</b><br><i>divisor</i>                          | The number you _____ by.                                  | In $8.4 \div 0.2$ , it is 0.2 |
| <b>equivalent division</b><br><i>división equivalente</i> | A new division problem with the _____ quotient.           | $8.4 \div 0.2 = 84 \div 2$    |
| <b>power of ten</b><br><i>potencia de diez</i>            | 10, 100, 1,000 and so on; each one is 10 times the _____. | $0.25 \times 100 = 25$        |

**KEY IDEA***complete each sentence*

- Multiply the divisor and the dividend by the \_\_\_\_\_ power of 10 until the divisor is a \_\_\_\_\_ number.
- The quotient does not \_\_\_\_\_:  $5 \div 0.25 = 500 \div 25 = 20$ .

**WORKED EXAMPLE***fill in the blanks as we solve*

How many 0.7-liter bottles can be filled from 8.4 liters?

**Step 1** Write  $8.4 \div 0.7$ . The divisor has \_\_\_\_ decimal place.**Step 2** Multiply both by 10: 0.7 becomes \_\_\_\_ and 8.4 becomes \_\_\_\_.**Step 3**  $84 \div 7 = 12$ . Check:  $12 \times 0.7 = 8.4$ **Answer** \_\_\_\_ bottles**YOU TRY***use the example as a model***1.** Rewrite with a whole-number divisor. Then divide.

**a.**  $6.4 \div 0.8 =$  \_\_\_\_\_

**b.**  $2.7 \div 0.3 =$  \_\_\_\_\_

**c.**  $1.8 \div 0.06 =$  \_\_\_\_\_

**2.** How many 0.4-liter cups can be filled from 9.6 liters of juice?*Show your work.***Answer** \_\_\_\_\_ cups**SUM IT UP***in your own words*

To divide by a decimal, I multiply both numbers by \_\_\_\_ because \_\_\_\_.
