

LESSON 2-9 • SESSION 1 • PREREQUISITE PRACTICE B • SKILL 1 OF 2

Find the Mean

Builds on Lesson 2-8 Session 1 • 6.SP.B.5c

TODAY'S LESSON

Every distance is measured from the mean. In Problem 3, first find $232 \div 4 = 58$.

YOU NEED TO

Find the mean: add the values, then divide by how many there are. **You will use it in Practice Form A, problems 3 and 6.**

STEPS TO FOLLOW*use these same steps on every problem*

- 1 Add** all the values.
- 2 Count** the values.
- 3 Divide** the sum by the count.

WATCH ME*the steps in action***Find the mean of 53, 57, 59 and 63.****Step 1** $53 + 57 + 59 + 63 = 232$.**Step 2** There are 4 values.**Step 3** $232 \div 4 = 58$.**Answer 58****TRY IT WITH HELP***fill in each step*

1. Find the mean of 12, 18, 20, 22 and 28.

Step 1 $12 + 18 + 20 + 22 + 28 = \underline{\hspace{2cm}}$ **Step 2** There are $\underline{\hspace{2cm}}$ values.**Step 3** $100 \div 5 = \underline{\hspace{2cm}}$

2. Find the mean of 6, 8, 10 and 12.

Step 1 $6 + 8 + 10 + 12 = \underline{\hspace{2cm}}$ **Step 2** There are $\underline{\hspace{2cm}}$ values.**Step 3** $36 \div 4 = \underline{\hspace{2cm}}$ **YOUR TURN***use the steps on your own*

3. Find the mean.

a. 4, 9, 10, 13 $\underline{\hspace{2cm}}$ **b.** 7, 8, 9, 8 $\underline{\hspace{2cm}}$ **c.** 28, 32, 38, 42 $\underline{\hspace{2cm}}$ **d.** 40, 46, 54, 60 $\underline{\hspace{2cm}}$

Divide With Decimal Quotients

Builds on Lesson 2-7 Session 1 • 6.NS.B.3

TODAY'S LESSONIn Problem 8, Group 2's distances total 10. The MAD is $10 \div 4 = 2.5$.**YOU NEED TO**Divide when the answer is not a whole number, like $10 \div 4 = 2.5$. **You will use it in Practice Form A, problem 8.****STEPS TO FOLLOW***use these same steps on every problem*

- 1 Divide** the whole number part. Note the remainder.
- 2 Write** a decimal point and a zero. Bring the zero down.
- 3 Keep dividing** until nothing is left.

WATCH ME*the steps in action***Find $10 \div 4$.****Step 1** $10 \div 4 = 2 \text{ R } 2$.**Step 2** Write 10.0. Bring down 0 to make 20.**Step 3** $20 \div 4 = 5$. The answer is 2.5.**Answer 2.5****TRY IT WITH HELP***fill in each step***4.** Find $12 \div 5$.**Step 1** $12 \div 5 = 2 \text{ R } \underline{\hspace{2cm}}$ **Step 2** Write 12.0. Bring down 0 to make $\underline{\hspace{2cm}}$.**Step 3** $20 \div 5 = 4$. The answer is $\underline{\hspace{2cm}}$.**5.** Find $2 \div 4$.**Step 1** $2 \div 4 = 0 \text{ R } \underline{\hspace{2cm}}$ **Step 2** Write 2.0. Bring down 0 to make $\underline{\hspace{2cm}}$.**Step 3** $20 \div 4 = 5$. The answer is $\underline{\hspace{2cm}}$.**YOUR TURN***use the steps on your own***6.** Divide.

a. $6 \div 4 = \underline{\hspace{2cm}}$

b. $14 \div 4 = \underline{\hspace{2cm}}$

c. $7 \div 5 = \underline{\hspace{2cm}}$

d. $18 \div 4 = \underline{\hspace{2cm}}$

e. $13 \div 5 = \underline{\hspace{2cm}}$

f. $9 \div 2 = \underline{\hspace{2cm}}$

READY CHECK*a problem like the one in today's lesson***7.** Four distances from the mean total 18. What is the MAD?**A** 4.2**B** 4.5**C** 14**D** 22**CHECK YOURSELF**☐ I can do this on my own☐ I need a little help☐ I have a question about # $\underline{\hspace{1cm}}$
