

LESSON 3-1 • SESSION 1 • GUIDED NOTES

Understanding Ratios

Learning target – I can describe a relationship between two quantities using ratio language. • 6.RP.A.1

WORDS TO KNOW*fill in the missing words*

WORD	WHAT IT MEANS	EXAMPLE
ratio <i>razón</i>	A comparison of two _____.	3 to 5, 3 : 5, 3/5
term <i>término</i>	One of the two _____ in a ratio.	In 3 : 5, the terms are 3 and 5.
part-to-part <i>parte a parte</i>	Compares one group with _____ group.	apples : oranges
part-to-whole <i>parte al todo</i>	Compares one group with the _____.	apples : all the fruit

KEY IDEA*complete each sentence*

- Write a ratio in the _____ the question asks.
- For part-to-whole, _____ the groups to find the whole.
- To simplify, divide both terms by the same _____.

WORKED EXAMPLE*fill in the blanks as we solve*

A shelf has 6 math books and 9 reading books. Write math to all books in simplest form.

Step 1 All books: $6 + 9 = \underline{\hspace{1cm}}$.

Step 2 Math first: $6 : \underline{\hspace{1cm}}$.

Step 3 Divide both terms by $\underline{\hspace{1cm}}$: $2 : 5$.

Answer Math to all books = $\underline{\hspace{1cm}} : 5$

YOU TRY*use the example as a model*

1. A pack has 10 pens and 15 pencils. Write each ratio in simplest form.

a. pens to pencils _____

b. pencils to all _____

2. A team has 7 forwards and 4 defenders. Write the ratio of defenders to forwards.

Show your work.

Ratio _____

SUM IT UP*in your own words*

In a ratio, order matters because _____.

LESSON 3-1 • SESSION 2 • GUIDED NOTES**Ratios and Tape Diagrams**

Learning target – I can use a tape diagram to share a total according to a given ratio. · 6.RP.A.1

WORDS TO KNOW*fill in the missing words*

WORD	WHAT IT MEANS	EXAMPLE
tape diagram <i>diagrama de cinta</i>	A drawing with _____ boxes that shows a ratio.	2 boxes : 3 boxes
unit (one box) <i>unidad</i>	The amount inside _____ box.	$24 \div 4$ boxes = 6 in each box
total parts <i>partes totales</i>	All the boxes _____ together.	$3 + 1 = 4$ parts

KEY IDEA*complete each sentence*

- Add the ratio terms to find the _____ parts.
- One box = total $\div$ _____.
- Multiply one box by each _____ to find each share.

WORKED EXAMPLE*fill in the blanks as we solve*

Ana and Ben share 28 stickers in the ratio 3 : 4. Find each share.

Step 1 Total parts: $3 + 4 =$ ____.**Step 2** One box: $28 \div 7 =$ ____ stickers.**Step 3** Ana: $3 \times 4 =$ ____ Ben: $4 \times 4 = 16$.**Answer** Ana gets ____ and Ben gets ____ Check: $12 + 16 = 28$ **YOU TRY***use the example as a model*

1. Add the terms to find the total parts.

a. $3 : 5$ _____

b. $7 : 2$ _____

c. $4 : 6$ _____

2. Share \$56 in the ratio 3 : 4. Find both shares.

Show your work.

Shares _____

SUM IT UP*in your own words*

To share a total in a ratio, I first ____ because ____.
