

LESSON 4-2 • SESSION 2 • PREREQUISITE PRACTICE B • SKILL 1 OF 2

Fractions, Decimals, and Percents

Builds on Lesson 4-2 Session 1 • 6.RP.A.3c

TODAY'S LESSON

You will write 0.76, 18/25, and 79% all as percents.

YOU NEED TOWrite a decimal or a fraction as a percent, like $0.9 = 90\%$. **You will use it in Practice Form A, problems 2 and 3.****STEPS TO FOLLOW***use these same steps on every problem*

- 1** Decimal: add zeros to get **two digits** after the point.
- 2** Fraction: multiply top and bottom to get **100** on the bottom.
- 3** The number of **hundredths** is the percent.

WATCH ME*the steps in action***Write 0.3 and 7/20 as percents.****Step 1** $0.3 = 0.30$.**Step 2** $7/20 = 35/100$ (multiply by 5).**Step 3** 0.30 is 30 hundredths: 30%. $35/100$ is 35%.**Answer** **0.3 = 30% and 7/20 = 35%****TRY IT WITH HELP***fill in each step*

- 1.**
- Write 0.9 and 4/5 as percents.

Step 1 $0.9 = 0.$ _____**Step 2** $4/5 =$ _____/100**Step 3** So $0.9 =$ _____% and $4/5 =$ _____%.

- 2.**
- Write 0.07 and 18/25 as percents.

Step 1 0.07 has two digits: _____ hundredths.**Step 2** $18/25 =$ _____/100**Step 3** So $0.07 =$ _____% and $18/25 =$ _____%.**YOUR TURN***use the steps on your own*

- 3.**
- Write each value as a percent.

a. $0.4 =$ ____ %

b. $3/4 =$ ____ %

c. $0.15 =$ ____ %

d. $9/20 =$ ____ %

e. $0.02 =$ ____ %

f. $7/10 =$ ____ %

Benchmark Fraction Equivalents

Builds on Grade 5 • 5.NF.B.3

TODAY'S LESSONYou will decide if $\frac{2}{5}$ or 0.45 is greater.**YOU NEED TO**Know common fractions as percents, like $\frac{2}{5} = 40\%$. **You will use it in Practice Form A, problems 1 and 6.****STEPS TO FOLLOW***use these same steps on every problem*

- 1** Know the **unit** percent: $\frac{1}{4} = 25\%$, $\frac{1}{5} = 20\%$, $\frac{1}{10} = 10\%$.
- 2** Look at the **top number**. It tells how many units.
- 3** **Multiply** the unit percent by the top number.

WATCH ME*the steps in action***Write $\frac{3}{4}$ as a percent.****Step 1** $\frac{1}{4} = 25\%$.**Step 2** The top number is 3.**Step 3** $3 \times 25\% = 75\%$.**Answer** $\frac{3}{4} = 75\%$ **TRY IT WITH HELP***fill in each step***4.** Write $\frac{2}{5}$ as a percent.**Step 1** $\frac{1}{5} = \underline{\hspace{1cm}}\%$ **Step 2** The top number is .**Step 3** $2 \times 20\% = \underline{\hspace{1cm}}\%$ **5.** Write $\frac{7}{10}$ as a percent.**Step 1** $\frac{1}{10} = \underline{\hspace{1cm}}\%$ **Step 2** The top number is .**Step 3** $7 \times 10\% = \underline{\hspace{1cm}}\%$ **YOUR TURN***use the steps on your own***6.** Write each fraction as a percent.**a.** $\frac{4}{5} = \underline{\hspace{1cm}}\%$ **b.** $\frac{1}{4} = \underline{\hspace{1cm}}\%$ **c.** $\frac{3}{10} = \underline{\hspace{1cm}}\%$ **d.** $\frac{3}{5} = \underline{\hspace{1cm}}\%$ **e.** $\frac{9}{10} = \underline{\hspace{1cm}}\%$ **f.** $\frac{2}{4} = \underline{\hspace{1cm}}\%$ **READY CHECK***a problem like the one in today's lesson***7.** Which is greater, $\frac{3}{5}$ or 58%?**A** 58%, because 58 is more than 3 and 5**B** $\frac{3}{5}$, because $\frac{3}{5} = 60\%$ **C** They are equal.**D** 58%, because $\frac{3}{5} = 35\%$ **CHECK YOURSELF**☐ I can do this on my own☐ I need a little help☐ I have a question about #
