

LESSON 4-5 • SESSION 1 • PRACTICE • FORM A**Find the Whole**

Learning target – I can find the whole when I know a part and the percent it represents. • 6.RP.A.3c

REMEMBER

- The **whole** is 100%. If the percent is less than 100%, the whole is **greater** than the part.
- Step down to a friendly percent (10%, 5%, or 25%), then **build up** to 100%.
- Check: the percent of your whole should give back the part.

WORKED EXAMPLE

24 stickers are 40% of a pack. How many stickers are in the pack?

Step 1 $40\% \div 4 = 10\%$, so $24 \div 4 = 6$.

Step 2 $10\% \times 10 = 100\%$, so $6 \times 10 = 60$.

Step 3 Check: $0.40 \times 60 = 24$.

Answer 60 stickers
