

LESSON 4-5 • SESSION 1 • GUIDED NOTES

Find the Whole

Learning target – I can find the whole when I know a part and the percent it represents. • 6.RP.A.3c

WORDS TO KNOW*fill in the missing words*

WORD	WHAT IT MEANS	EXAMPLE
part <i>parte</i>	The amount you ____; it matches a percent.	24 stickers = 40%
whole <i>entero</i>	The full amount. It is ____.	the whole sticker pack
double number line <i>doble recta numérica</i>	Two lines that ____ amounts with percents.	\$6 at 10%, \$60 at 100%

KEY IDEA*complete each sentence*

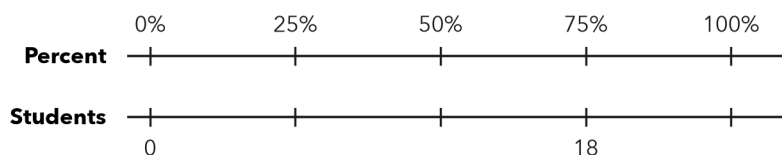

- The whole is 100%. When the percent is less than 100%, the whole is ____ than the part.
- Divide to find a small percent like ____, then multiply up to 100%.
- Check: the percent of your whole gives back the ____.

WORKED EXAMPLE*fill in the blanks as we solve*

24 stickers are 40% of a pack. How many stickers are in the whole pack?

Step 1 $40\% \div 4 = 10\%$, so $24 \div 4 = \underline{\hspace{1cm}}$ stickers.**Step 2** $10\% \times 10 = 100\%$, so $6 \times 10 = \underline{\hspace{1cm}}$ stickers.**Step 3** Check: $0.40 \times 60 = \underline{\hspace{1cm}}$ **Answer** The pack has 60 stickers.**YOU TRY***use the example as a model***1.** Find each whole.

- a.** 8 is 10% of _____ **b.** 15 is 25% of _____ **c.** 30 is 60% of _____

2. 18 students ride the bus. That is 75% of the class. How many students are in the class?**Answer** _____ students**SUM IT UP***in your own words*

To find the whole, I first find ____ because ____.

LESSON 4-5 • SESSION 2 • GUIDED NOTES**Solve for the Whole**

Learning target – I can write and solve an equation to find the whole from a part and a percent. • 6.RP.A.3c

WORDS TO KNOW*fill in the missing words*

WORD	WHAT IT MEANS	EXAMPLE
variable <i>variable</i>	A letter that stands for an _____ number.	w = the whole
equation <i>ecuación</i>	A math sentence with an _____ sign.	$0.6 \times w = 138$
inverse operation <i>operación inversa</i>	An operation that _____ another. Division undoes multiplication.	$w = 138 \div 0.6$

KEY IDEA*complete each sentence*

- Write the equation percent $\times$ whole = part, with the percent as a _____.
- Divide the part by the decimal to find ____.
- Check: multiply your w by the percent to get the _____.

WORKED EXAMPLE*fill in the blanks as we solve*A player scored 42 points. That is 35% of the team's points. Find the team's total w .**Step 1** $35\% = \underline{\hspace{2cm}}$ **Step 2** Equation: $0.35 \times w = \underline{\hspace{2cm}}$ **Step 3** $w = 42 \div 0.35 = \underline{\hspace{2cm}}$ **Answer** The team scored _____ points.**YOU TRY***use the example as a model***1.** Solve each equation for w .

a. $0.5 \times w = 23$ _____

b. $0.2 \times w = 9$ _____

c. $0.8 \times w = 40$ _____

2. A tip of \$7.20 is 15% of a bill. Write an equation and find the bill.*Show your work.***Equation, bill** _____**SUM IT UP***in your own words*

To solve for the whole, I divide because ____.
