

LESSON 5-1 • SESSION 2 • PREREQUISITE PRACTICE A • SKILL 1 OF 2

Multiply, Then Take Half

Builds on Grade 5 • 5.NF.B.4

TODAY'S LESSON

You will find the area of a rhombus with diagonals 18 ft and 24 ft: $(18 \times 24) \div 2$.

YOU NEED TO

Multiply two numbers, then take half of the product. **You will use it in Practice Form A, problems 3 and 6.**

STEPS TO FOLLOW*use these same steps on every problem*

- 1** **Multiply** the two numbers.
- 2** Take **half** of the product: divide by 2.
- 3** Write the unit, like **square feet**.

WATCH ME*the steps in action***Find half of 20×14 .****Step 1** $20 \times 14 = 280$.**Step 2** $280 \div 2 = 140$.**Step 3** The answer is 140.**Answer 140****TRY IT WITH HELP***fill in each step*

- 1.** Find half of 30×12 .

Step 1 $30 \times 12 = \underline{\hspace{2cm}}$ **Step 2** $\underline{\hspace{2cm}} \div 2 = \underline{\hspace{2cm}}$ **Step 3** The answer is $\underline{\hspace{2cm}}$.

- 2.** Find half of 16×15 .

Step 1 $16 \times 15 = \underline{\hspace{2cm}}$ **Step 2** $\underline{\hspace{2cm}} \div 2 = \underline{\hspace{2cm}}$ **Step 3** The answer is $\underline{\hspace{2cm}}$.**YOUR TURN***use the steps on your own*

- 3.** Multiply, then take half.

a. 10×14 , then half = $\underline{\hspace{1cm}}$ **b.** 8×25 , then half = $\underline{\hspace{1cm}}$ **c.** 30×16 , then half = $\underline{\hspace{1cm}}$ **d.** 12×11 , then half = $\underline{\hspace{1cm}}$ **e.** 20×13 , then half = $\underline{\hspace{1cm}}$ **f.** 18×5 , then half = $\underline{\hspace{1cm}}$

Classify Quadrilaterals

Builds on Grade 5 • 5.G.B.4

TODAY'S LESSONYou will use $A = b \times h$ on a rhombus, because a rhombus is a parallelogram.**YOU NEED TO**Tell which shapes are parallelograms. **You will use it in Practice Form A, problems 1 and 2.****STEPS TO FOLLOW***use these same steps on every problem*

- 1** A parallelogram has **two pairs** of parallel sides.
- 2** A **rectangle, rhombus,** and **square** each have them.
- 3** If yes, the shape is a **parallelogram**.

WATCH ME*the steps in action***Is a rhombus a parallelogram?**

- Step 1** A rhombus has 4 equal sides.
- Step 2** Its opposite sides are parallel, two pairs.
- Step 3** Yes. A rhombus is a parallelogram.

Answer Yes**TRY IT WITH HELP***fill in each step*

- 4.** Is a rectangle a parallelogram?
- Step 1** A rectangle has opposite sides that are _____.
- Step 2** How many pairs of parallel sides? _____
- Step 3** _____. A rectangle is a parallelogram.
- 5.** Is a square a parallelogram?
- Step 1** A square has opposite sides that are _____.
- Step 2** How many pairs of parallel sides? _____
- Step 3** _____. A square is a parallelogram.

YOUR TURN*use the steps on your own*

- 6.** Write yes or no: is it a parallelogram?
- a.** rhombus ____ **b.** rectangle ____
- c.** trapezoid ____ **d.** square ____

READY CHECK*a problem like the one in today's lesson*

- 7.** Pia says a rhombus is not a parallelogram. Which fact shows she is wrong?
- A** Opposite sides are parallel **B** It has 4 equal sides
- C** It has no right angles **D** Diagonals are equal

CHECK YOURSELF
☐ I can do this on my own ☐ I need a little help ☐ I have a question about #____
