

LESSON 5-2 • SESSION 2 • PREREQUISITE PRACTICE B • SKILL 1 OF 2

Area of Triangles

Builds on Lesson 5-2 Session 1 • 6.G.A.1

TODAY'S LESSONYou will check a missing base by finding the area forward: $\frac{1}{2} \times b \times h$.**YOU NEED TO**Find the area of a triangle: $\frac{1}{2} \times b \times h$. **You will use it in Practice Form A, problems 3 and 6.****STEPS TO FOLLOW***use these same steps on every problem*

- 1** Find the **base** and the **height**.
- 2** **Multiply** $b \times h$, then take **half**.
- 3** Write **square units**.

WATCH ME*the steps in action***Base 14 cm, height 6 cm. Find the area.****Step 1** Base 14 cm. Height 6 cm.**Step 2** $14 \times 6 = 84$. Half of 84 is 42.**Step 3** The area is 42 cm².**Answer 42 cm²****TRY IT WITH HELP***fill in each step*

- 1.** Base 12 in., height 9 in. Find the area.

Step 1 Base ____ in. Height ____ in.**Step 2** $12 \times 9 =$ _____. Half of _____ is _____.**Step 3** The area is _____ in².

- 2.** Base 24 ft, height 7 ft. Find the area.

Step 1 Base ____ ft. Height ____ ft.**Step 2** $24 \times 7 =$ _____. Half of _____ is _____.**Step 3** The area is _____ ft².**YOUR TURN***use the steps on your own*

- 3.** Find each area.

a. $b = 10, h = 8$: ____**b.** $b = 16, h = 5$: ____**c.** $b = 9, h = 6$: ____**d.** $b = 20, h = 7$: ____

Missing Parallelogram Measures

Builds on Lesson 5-1 Session 1 • 6.G.A.1

TODAY'S LESSON

You will find the height of a triangle when the area is 54 in^2 and the base is 12 in.

YOU NEED TO

Find a missing measure by dividing: $A \div \text{base} = \text{height}$. **You will use it in Practice Form A, problems 3 and 7.**

STEPS TO FOLLOW*use these same steps on every problem*

- 1** Write the area as a **product**: $A = b \times h$.
- 2** **Divide** the area by the measure you know.
- 3** **Check** by multiplying $b \times h$.

WATCH ME*the steps in action*

A parallelogram has area 135 cm^2 and base 15 cm. Find the height.

Step 1 $135 = 15 \times h$.

Step 2 $135 \div 15 = 9$.

Step 3 Check: $15 \times 9 = 135$.

Answer **9 cm**

TRY IT WITH HELP*fill in each step*

4. Area 108 ft^2 , height 9 ft. Find the base.

Step 1 $108 = b \times \underline{\hspace{2cm}}$

Step 2 $108 \div 9 = \underline{\hspace{2cm}}$

Step 3 Check: $\underline{\hspace{2cm}} \times 9 = 108$

5. Area 96 m^2 , base 8 m. Find the height.

Step 1 $96 = \underline{\hspace{2cm}} \times h$

Step 2 $96 \div 8 = \underline{\hspace{2cm}}$

Step 3 Check: $8 \times \underline{\hspace{2cm}} = 96$

YOUR TURN*use the steps on your own*

6. Find the missing measure.

a. $A = 48$, $b = 6$; missing = $\underline{\hspace{2cm}}$

b. $A = 90$, $h = 9$; missing = $\underline{\hspace{2cm}}$

c. $A = 77$, $b = 11$; missing = $\underline{\hspace{2cm}}$

d. $A = 144$, $h = 12$; missing = $\underline{\hspace{2cm}}$

READY CHECK*a problem like the one in today's lesson*

7. A parallelogram has area 120 cm^2 and base 8 cm. Which equation finds its height?

A $120 \div 8 = h$

B $120 \times 8 = h$

C $120 + 8 = h$

D $8 \div 120 = h$

CHECK YOURSELF
☐ I can do this on my own

☐ I need a little help

☐ I have a question about # $\underline{\hspace{2cm}}$
