

LESSON 5-5 • SESSION 1 • PREREQUISITE PRACTICE B • SKILL 1 OF 2

Find the Base Area

Builds on Lesson 5-1 Session 1 • 6.G.A.1

TODAY'S LESSONYou will find the base of a box first, like 16 in $\times$ 11 in for the fish tank.**YOU NEED TO**Find the area of the bottom face: length $\times$ width. **You will use it in Practice Form A, problems 3 and 4.****STEPS TO FOLLOW***use these same steps on every problem*

- 1 Find** the bottom face: the length and the width.
- 2 Leave out** the height. It is not part of the base.
- 3 Multiply** length $\times$ width. Write square units.

WATCH ME*the steps in action*

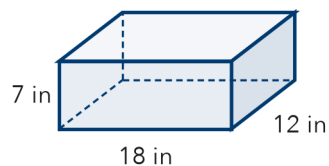

A box is 18 in long, 12 in wide, and 7 in tall. Find the base area.

Step 1 Bottom: 18 in by 12 in.

Step 2 Leave out the 7 in height.

Step 3 $18 \times 12 = 216$, so 216 in².

Answer 216 in²

**TRY IT WITH HELP***fill in each step*

- 1.** A box is 14 cm long, 9 cm wide, and 5 cm tall. Find the base area.

Step 1 Bottom: _____ cm by _____ cm

Step 2 Leave out the height: _____ cm

Step 3 $14 \times 9 =$ _____ cm²

- 2.** A box is 20 in long, 13 in wide, and 6 in tall. Find the base area.

Step 1 Bottom: _____ in by _____ in

Step 2 Leave out the height: _____ in

Step 3 $20 \times 13 =$ _____ in²

YOUR TURN*use the steps on your own*

- 3.** Find each base area. Each box is length $\times$ width $\times$ height.

a. 15 ft $\times$ 12 ft $\times$ 4 ft _____

b. 17 m $\times$ 6 m $\times$ 9 m _____

c. 25 cm $\times$ 11 cm $\times$ 3 cm _____

d. 19 in $\times$ 10 in $\times$ 7 in _____

Count Cubes in Layers

Builds on Grade 5 • 5.MD.C.5a

TODAY'S LESSONYou will count cubes in a toy chest: one layer $\times$ layers.**YOU NEED TO**Find the cubes in one layer, then multiply by the layers. **You will use it in Practice Form A, problems 2 and 3.****STEPS TO FOLLOW***use these same steps on every problem*

- 1 Count** the cubes in one layer: length $\times$ width.
- 2 Count** the layers. That is the height.
- 3 Multiply:** cubes in one layer $\times$ number of layers.

WATCH ME*the steps in action*

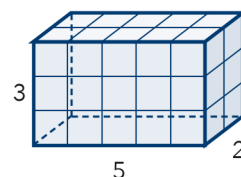

A box is 5 cubes long, 2 cubes wide, and 3 cubes tall. How many cubes fill it?

Step 1 One layer: $5 \times 2 = 10$ cubes.

Step 2 There are 3 layers.

Step 3 $10 \times 3 = 30$.

Answer 30 cubes

**TRY IT WITH HELP***fill in each step*

- 4.** A box is 4 cubes long, 2 cubes wide, and 3 cubes tall. How many cubes fill it?

Step 1 One layer: $4 \times 2 = \underline{\hspace{2cm}}$ cubes

Step 2 Number of layers: $\underline{\hspace{2cm}}$

Step 3 $8 \times 3 = \underline{\hspace{2cm}}$ cubes

- 5.** A box is 6 cubes long, 3 cubes wide, and 2 cubes tall. How many cubes fill it?

Step 1 One layer: $6 \times 3 = \underline{\hspace{2cm}}$ cubes

Step 2 Number of layers: $\underline{\hspace{2cm}}$

Step 3 $18 \times 2 = \underline{\hspace{2cm}}$ cubes

YOUR TURN*use the steps on your own*

- 6.** Find the number of cubes.

a. 3 long, 2 wide, 4 tall $\underline{\hspace{2cm}}$

b. 5 long, 4 wide, 2 tall $\underline{\hspace{2cm}}$

c. 6 long, 5 wide, 3 tall $\underline{\hspace{2cm}}$

d. 7 long, 2 wide, 5 tall $\underline{\hspace{2cm}}$

READY CHECK*a problem like the one in today's lesson*

- 7.** A box is 6 cubes long, 3 wide, and 4 tall. How many cubes fill it?

A 13

B 18

C 72

D 36

CHECK YOURSELF
☐ I can do this on my own

☐ I need a little help

☐ I have a question about # $\underline{\hspace{1cm}}$
