

LESSON 5-6 • SESSION 1 • GUIDED NOTES

Drawing Nets of Solids

Learning target – I can draw the net of a solid by unfolding its faces onto a flat surface. · 6.G.A.4

WORDS TO KNOW

fill in the missing words

WORD	WHAT IT MEANS	EXAMPLE
net <i>plantilla</i>	A flat _____ that folds into a solid.	an unfolded box
face <i>cara</i>	One _____ side of a solid.	a cube has 6 faces
prism <i>prisma</i>	A solid with two matching _____ joined by rectangles.	a box, a tent
pyramid <i>pirámide</i>	A solid with one base and _____ faces that meet at a point.	square base + 4 triangles

KEY IDEA

complete each sentence

- Every face of the solid appears _____ in its net.
- Edges that fold together must have the same _____.
- A rectangular prism net has _____ rectangles in 3 matching pairs.

WORKED EXAMPLE

fill in the blanks as we solve

Draw a net for a box 5 cm long, 3 cm wide, and 2 cm tall.

Step 1 Bottom and top: two _____ cm by 3 cm rectangles.

Step 2 Front and back: two 5 cm by _____ cm rectangles.

Step 3 Left and right: two _____ cm by 2 cm rectangles.

Answer _____ rectangles in all

YOU TRY

use the example as a model

- This net folds into a square pyramid.
 - Area of the base _____ cm^2
 - Area of one triangle _____ cm^2

- How many shapes are in each net?
 - cube: _____
 - triangular prism: _____

SUM IT UP

in your own words

To check that a net is correct, I _____ and _____.

LESSON 5-6 • SESSION 2 • GUIDED NOTES

Reading Nets and Solids

Learning target – I can name the solid a net makes by reading the shapes in the net. • 6.G.A.4

WORDS TO KNOW

fill in the missing words

WORD	WHAT IT MEANS	EXAMPLE
edge <i>arista</i>	A _____ where two faces meet.	a cube has 12 edges
vertex <i>vértice</i>	A _____ where edges meet.	a cube has 8 vertices
base <i>base</i>	The face that _____ a prism or a pyramid.	hexagon base: hexagonal prism

KEY IDEA

complete each sentence

- A prism has _____ matching bases joined by rectangles.
- A pyramid has _____ base and triangles that meet at a point.
- Count edges and vertices on the _____ solid, not on the flat net.

WORKED EXAMPLE

fill in the blanks as we solve

A net has 1 square and 4 triangles. Name the solid and count its faces, edges, and vertices.

Step 1 Pieces: $1 + 4 =$ _____ faces.

Step 2 One square base with triangles: a square _____.

Step 3 Edges: $4 + 4 =$ _____. Vertices: $4 + 1 = 5$.

Answer square pyramid: 5 faces, 8 edges, _____ vertices

YOU TRY

use the example as a model

1. Look at the net.

a. Name the solid. _____

b. Number of faces _____

2. Name the solid each net makes.

a. 2 octagons + 8 rectangles: _____

b. 1 hexagon + 6 triangles: _____

SUM IT UP

in your own words

I can tell a prism from a pyramid by _____.
