

LESSON 6-2 • SESSION 2 • PREREQUISITE PRACTICE A • SKILL 1 OF 2

Rewrite Mixed Numbers as Fractions

Builds on Grade 4 • 4.NF.B.3

TODAY'S LESSONYou will find $4\frac{1}{2} \div \frac{3}{4}$. First you write $4\frac{1}{2}$ as $\frac{9}{2}$.**YOU NEED TO**Write a mixed number as a fraction, like $2\frac{1}{3} = \frac{7}{3}$. **You will use it in Practice Form A, problems 1 and 2.****STEPS TO FOLLOW***use these same steps on every problem*

- 1** **Multiply** the whole number by the bottom number.
- 2** **Add** the top number.
- 3** Write the sum **over** the bottom number.

WATCH ME*the steps in action***Write $2\frac{1}{3}$ as a fraction.****Step 1** $2 \times 3 = 6$.**Step 2** $6 + 1 = 7$.**Step 3** $\frac{7}{3}$.**Answer** $2\frac{1}{3} = \frac{7}{3}$ **TRY IT WITH HELP***fill in each step*

- 1.**
- Write
- $4\frac{1}{2}$
- as a fraction.

Step 1 $4 \times 2 = \underline{\hspace{2cm}}$ **Step 2** $\underline{\hspace{2cm}} + 1 = \underline{\hspace{2cm}}$ **Step 3** $4\frac{1}{2} = \underline{\hspace{2cm}}/2$

- 2.**
- Write
- $3\frac{3}{4}$
- as a fraction.

Step 1 $3 \times 4 = \underline{\hspace{2cm}}$ **Step 2** $\underline{\hspace{2cm}} + 3 = \underline{\hspace{2cm}}$ **Step 3** $3\frac{3}{4} = \underline{\hspace{2cm}}/4$ **YOUR TURN***use the steps on your own*

- 3.**
- Write each mixed number as a fraction.

a. $1\frac{1}{2} = \underline{\hspace{2cm}}$

b. $2\frac{1}{4} = \underline{\hspace{2cm}}$

c. $5\frac{1}{2} = \underline{\hspace{2cm}}$

d. $1\frac{3}{4} = \underline{\hspace{2cm}}$

e. $3\frac{3}{8} = \underline{\hspace{2cm}}$

f. $9\frac{1}{3} = \underline{\hspace{2cm}}$

Rewrite Fractions as Mixed Numbers

Builds on Grade 4 • 4.NF.B.3

TODAY'S LESSONYou will find $5 \frac{1}{2} \div 1 \frac{1}{4} = 22/5$. Then you write it as $4 \frac{2}{5}$.**YOU NEED TO**Write a fraction like $22/5$ as a mixed number. **You will use it in Practice Form A, problem 1.****STEPS TO FOLLOW***use these same steps on every problem*

- 1 Divide** the top by the bottom.
- 2** The quotient is the **whole number**.
- 3** The remainder goes **over** the bottom number.

WATCH ME*the steps in action***Write $22/5$ as a mixed number.****Step 1** $22 \div 5 = 4 \text{ R } 2$.**Step 2** The whole number is 4.**Step 3** The remainder 2 goes over 5.**Answer** $4 \frac{2}{5}$ **TRY IT WITH HELP***fill in each step***4.** Write $9/2$ as a mixed number.**Step 1** $9 \div 2 = \underline{\hspace{2cm}} \text{ R } \underline{\hspace{2cm}}$ **Step 2** The whole number is $\underline{\hspace{2cm}}$.**Step 3** $9/2 = 4 \underline{\hspace{2cm}}/2$ **5.** Write $27/4$ as a mixed number.**Step 1** $27 \div 4 = \underline{\hspace{2cm}} \text{ R } \underline{\hspace{2cm}}$ **Step 2** The whole number is $\underline{\hspace{2cm}}$.**Step 3** $27/4 = \underline{\hspace{2cm}} \underline{\hspace{2cm}}/4$ **YOUR TURN***use the steps on your own***6.** Write each fraction as a mixed number.**a.** $7/2 = \underline{\hspace{2cm}}$ **b.** $11/4 = \underline{\hspace{2cm}}$ **c.** $10/3 = \underline{\hspace{2cm}}$ **d.** $17/5 = \underline{\hspace{2cm}}$ **e.** $25/8 = \underline{\hspace{2cm}}$ **f.** $13/6 = \underline{\hspace{2cm}}$ **READY CHECK***a problem like the one in today's lesson***7.** Lia finds $1 \frac{3}{4} \div 1/2 = 7/2$. What is $7/2$ as a mixed number?**A** $3 \frac{1}{2}$ **B** $7 \frac{1}{2}$ **C** $3 \frac{1}{7}$ **D** $2 \frac{1}{2}$ **CHECK YOURSELF**
☐ I can do this on my own
 ☐ I need a little help
 ☐ I have a question about #____
