

Polygons and Perimeter on the Plane

1. Find each side length.

a. $(-6, 2)$ to $(3, 2)$ _____

b. $(3, 2)$ to $(3, -4)$ _____

2. A rectangle has vertices $(-6, 2)$, $(3, 2)$, $(3, -4)$ and $(-6, -4)$. Find its perimeter and its area.

Show your work.

Answer _____

3. Perimeter is found by –

A adding all the sides

B multiplying length by width

C counting the vertices

D subtracting the sides

HOW DID IT GO? ☐ I got it ☐ Almost ☐ I need help

Designing Polygons with Scale

1. On a map, 1 unit = 3 m.

a. 9 units = ____ m

b. 48 m = ____ units

2. A rectangle is 4 units by 6 units on a plan. 1 unit = 5 ft. Find the real area.

Show your work.

Answer _____ ft²

3. To find a missing side from an area and one side, you –

A multiply

B divide

C add

D subtract
