

LESSON 8-1 • SESSION 1 • GUIDED NOTES

Equations and Solutions

Learning target – I can check whether a value is a solution of an equation by substituting it. · 6.EE.B.5

WORDS TO KNOW*fill in the missing words*

WORD	WHAT IT MEANS	EXAMPLE
equation <i>ecuación</i>	A math sentence that says two amounts are ____.	$x + 3 = 10$
variable <i>variable</i>	A letter that stands for an ____ number.	the x in $x + 3 = 10$
solution <i>solución</i>	A value that makes the equation ____.	$x = 7$
substitute <i>sustituir</i>	____ the variable with a number.	put 7 in place of x

KEY IDEA*complete each sentence*

- To test a value, _____ it for the variable and do the math.
- If both sides are _____, the value is a solution. If not, it is not a solution.

WORKED EXAMPLE*fill in the blanks as we solve*Is $k = 7$ a solution of $k - 4 = 2$? Is $k = 6$?**Step 1** $k = 7$: $7 - 4 = \underline{\quad}$. $3 \neq 2$, so the equation is ____.**Step 2** $k = 6$: $6 - 4 = \underline{\quad}$. $2 = 2$, so the equation is true.**Answer** $k = \underline{\quad}$ is the solution.**YOU TRY***use the example as a model***1.** Substitute the value. Write **T** for true or **F** for false.

a. $4k = 20$ ($k = 5$) ____

b. $n - 2 = 6$ ($n = 4$) ____

2. Which of 6, 8 or 9 is the solution of $7m = 56$?*Show your work.***m** = _____**SUM IT UP***in your own words*

A number is a solution of an equation when ____ because ____.

LESSON 8-1 • SESSION 2 • GUIDED NOTES

Writing Equations

Learning target – I can write an equation for a situation and test a proposed answer. • 6.EE.B.6

WORDS TO KNOW*fill in the missing words*

WORD	WHAT IT MEANS	EXAMPLE
variable <i>variable</i>	A letter that stands for the _____ number.	let m = marbles lost
equation <i>ecuación</i>	A math sentence with an _____ sign.	$30 - m = 11$
increased by <i>aumentado en</i>	Means _____.	$n + 9$
decreased by <i>disminuido en</i>	Means _____.	$n - 9$

KEY IDEA*complete each sentence*

- Name the unknown with a _____ and say what it means.
- Write the story as a math sentence, like start ____ lost = left, or groups $\times$ size = _____.

WORKED EXAMPLE*fill in the blanks as we solve*

A jar had 30 marbles. Some rolled away and 11 are left. How many rolled away?

Step 1 Let m = the marbles that _____.**Step 2** Start – lost = left: $30 - m = \underline{\hspace{1cm}}$.**Step 3** Test $m = 19$: $30 - 19 = \underline{\hspace{1cm}}$. True.**Answer** 19 marbles rolled away.**YOU TRY***use the example as a model*

- Write an equation for each sentence. Use n .

a. A number plus 8 is 15. _____**b.** 3 times a number is 21. _____

- A crate had 46 milk cartons. Some were taken, and 13 are left. Write an equation. Find the number taken.

*Show your work.***Equation; answer** _____**SUM IT UP***in your own words*

To write an equation for a story, I _____ because _____.
