

LESSON 8-3 • SESSION 1 • GUIDED NOTES

Multiplication Equations

Learning target – I can solve a multiplication equation by dividing both sides by the same number. · 6.EE.B.7

WORDS TO KNOW*fill in the missing words*

WORD	WHAT IT MEANS	EXAMPLE
coefficient <i>coeficiente</i>	The number that _____ the variable.	the 3 in $3x$
inverse operations <i>operaciones inversas</i>	$\times$ and $\div$ _____ each other.	$5 \times 9 = 45$, so $45 \div 5 = 9$
Division Property of Equality <i>propiedad de división de la igualdad</i>	Divide both sides by the same number (not _____). They stay equal.	both sides $\div 3$

KEY IDEA*complete each sentence*

- Division _____ multiplication.
- To solve $5b = 45$, divide both sides by the _____, 5.

WORKED EXAMPLE*fill in the blanks as we solve*A room holds 84 chairs in 6 equal stacks. Solve $6c = 84$.**Step 1** The coefficient is ____.**Step 2** Divide both sides by 6: $c = 84 \div 6 =$ ____.**Step 3** Check: $6 \times 14 =$ ____.**Answer** $c =$ ____ chairs in each stack**YOU TRY***use the example as a model***1.** Solve each equation.

a. $7x = 63$ ____

b. $4n = 52$ ____

2. Solve $4w = 3.2$. Check your answer.*Show your work.***w =** _____**SUM IT UP***in your own words*

To solve a multiplication equation, I ____ because ____.

LESSON 8-3 • SESSION 2 • GUIDED NOTES

Division Equations

Learning target – I can solve a division equation by multiplying both sides by the same number. • 6.EE.B.7

WORDS TO KNOW*fill in the missing words*

WORD	WHAT IT MEANS	EXAMPLE
divisor <i>divisor</i>	The number you _____ by.	the 4 in $n \div 4$
Multiplication Property of Equality <i>propiedad de multiplicación de la igualdad</i>	Multiply _____ sides by the same number. They stay equal.	both sides $\times 4$
equal groups <i>grupos iguales</i>	Groups that each have the _____ amount.	24 is 4 groups of 6

KEY IDEA*complete each sentence*

- Multiplication _____ division.
- To solve $n \div 4 = 7$, multiply both sides by ____.

WORKED EXAMPLE*fill in the blanks as we solve*Nine hikers share a bag of trail mix equally. Each gets 7 ounces. Solve $t \div 9 = 7$.**Step 1** Multiply both sides by ____.**Step 2** $t = 7 \times 9 = \underline{\hspace{1cm}}$.**Step 3** Check: $63 \div 9 = \underline{\hspace{1cm}}$.**Answer** The bag holds ounces.**YOU TRY***use the example as a model***1.** Solve each equation.

a. $x \div 3 = 12$ _____

b. $n \div 7 = 8$ _____

2. Solve $n \div 2 = 1.5$. Check your answer.*Show your work.***n** = _____**SUM IT UP***in your own words*

To solve a division equation, I _____ because _____.
