

LESSON 9-1 • SESSION 1 • GUIDED NOTES

Independent and Dependent Variables

Learning target – I can name the independent and dependent variables in a relationship. • 6.EE.C.9

WORDS TO KNOW*fill in the missing words*

WORD	WHAT IT MEANS	EXAMPLE
independent variable <i>variable independiente</i>	The ____: the quantity you choose or that comes first.	hours studied
dependent variable <i>variable dependiente</i>	The ____: it changes because of the input.	quiz score
depends on <i>depende de</i>	The output ____ when the input changes.	Score depends on study time.

KEY IDEA*complete each sentence*

- Sentence test: the dependent variable _____ the independent variable.
- On a graph, the independent variable goes on the _____ and the dependent variable goes on the _____.

WORKED EXAMPLE*fill in the blanks as we solve*

A bike rental costs \$5 for each hour. Name the variables.

Step 1 The two quantities are hours rented and _____.

Step 2 The cost changes when the hours change, so cost _____ hours.

Answer **Independent:** _____ • **Dependent:** _____

YOU TRY*use the example as a model*

1. Name the dependent variable in each pair.
 - a. minutes jogged, calories burned _____
 - b. total bill, pizzas ordered _____
2. The longer Rosa plays a video game, the more levels she completes. Write a sentence with "depends on."

Sentence _____

SUM IT UP*in your own words*

I can tell which variable is independent by ____ because ____.

LESSON 9-1 • SESSION 2 • GUIDED NOTES**Tables of Values**

Learning target – I can build a table of values for a relationship between two variables. · 6.EE.C.9

WORDS TO KNOW*fill in the missing words*

WORD	WHAT IT MEANS	EXAMPLE
table of values <i>tabla de valores</i>	A list of _____ matched with their outputs.	x: 1, 2 y: 9, 18
input <i>entrada</i>	The number you start with. It goes in the _____ column.	hours worked
output <i>salida</i>	The number you get _____ you use the rule.	boxes packed

KEY IDEA*complete each sentence*

- Use the _____ rule on every input.
- With a fee, _____ first, then add the fee.

WORKED EXAMPLE*fill in the blanks as we solve*A worker packs 9 boxes each hour, so $b = 9h$. Find b for $h = 1, 2$, and 3.**Step 1** $h = 1$: $9 \times 1 = \underline{\hspace{1cm}}$ **Step 2** $h = 2$: $9 \times 2 = \underline{\hspace{1cm}}$ **Step 3** $h = 3$: $9 \times 3 = \underline{\hspace{1cm}}$ **Answer Pairs:** (1, 9), (2, 18), (3,)**YOU TRY***use the example as a model*

1. Use the rule $y = 5x + 1$ to complete the table.

x	0	1	2	3
y				

2. A copier prints 35 pages each minute. How many pages?

a. 2 minutes: _____**b.** 4 minutes: _____**SUM IT UP***in your own words*

To build a table of values, I _____ and then _____.
