

LESSON 9-3 • SESSION 1 • PREREQUISITE PRACTICE A • SKILL 1 OF 2

Divide Multi-Digit Numbers

Builds on Grade 5 • 5.NBT.B.6

TODAY'S LESSONYou will divide y by x , like $90 \div 10$ and $100 \div 4$, to find a rule.**YOU NEED TO**Divide like $144 \div 6$ by breaking the number into friendly parts. **You will use it in Practice Form A, problems 5, 6, and 7.****STEPS TO FOLLOW***use these same steps on every problem*

- 1 Break** the number into parts the divisor goes into easily.
- 2 Divide** each part.
- 3 Add** the answers.

WATCH ME*the steps in action***144 $\div$ 6****Step 1** $144 = 120 + 24$ **Step 2** $120 \div 6 = 20$. $24 \div 6 = 4$.**Step 3** $20 + 4 = 24$ **Answer 24****TRY IT WITH HELP***fill in each step***1.** $225 \div 9$ **Step 1** $225 = 180 + \underline{\hspace{2cm}}$ **Step 2** $180 \div 9 = \underline{\hspace{2cm}}$. $45 \div 9 = \underline{\hspace{2cm}}$.**Step 3** $20 + 5 = \underline{\hspace{2cm}}$ **2.** $96 \div 8$ **Step 1** $96 = 80 + \underline{\hspace{2cm}}$ **Step 2** $80 \div 8 = \underline{\hspace{2cm}}$. $16 \div 8 = \underline{\hspace{2cm}}$.**Step 3** $10 + 2 = \underline{\hspace{2cm}}$ **YOUR TURN***use the steps on your own***3.** Divide. Use the same three steps.

a. $84 \div 7 = \underline{\hspace{2cm}}$

b. $120 \div 8 = \underline{\hspace{2cm}}$

c. $192 \div 8 = \underline{\hspace{2cm}}$

d. $252 \div 7 = \underline{\hspace{2cm}}$

e. $150 \div 6 = \underline{\hspace{2cm}}$

f. $108 \div 9 = \underline{\hspace{2cm}}$

Find the Rule of a Pattern

Builds on Grade 5 • 5.OA.B.3

TODAY'S LESSONYou will see y go 9, 13, 17 and find the start when $x = 0$.**YOU NEED TO**Find the rule of a pattern and the term just before, like 10, 13, 16: before is 7. **You will use it in Practice Form A, problem 8.****STEPS TO FOLLOW***use these same steps on every problem*

- 1 Subtract** two terms that are next to each other.
- 2** Check that the **same** amount works for every pair.
- 3** Add it to go **forward**. Subtract it to go back.

WATCH ME*the steps in action***10, 13, 16. Find the next term and the term before.****Step 1** $13 - 10 = 3$ **Step 2** $16 - 13 = 3$. The rule is add 3.**Step 3** Next: $16 + 3 = 19$. Before: $10 - 3 = 7$.**Answer** **next 19; before 7****TRY IT WITH HELP***fill in each step***4.** 12, 18, 24. Find the term before.**Step 1** $18 - 12 = \underline{\hspace{2cm}}$ **Step 2** $24 - 18 = \underline{\hspace{2cm}}$. The rule is add 6.**Step 3** Before: $12 - 6 = \underline{\hspace{2cm}}$ **5.** 9, 16, 23. Find the next term.**Step 1** $16 - 9 = \underline{\hspace{2cm}}$ **Step 2** $23 - 16 = \underline{\hspace{2cm}}$. The rule is add 7.**Step 3** Next: $23 + 7 = \underline{\hspace{2cm}}$ **YOUR TURN***use the steps on your own***6.** Write the term that comes just before each list.**a.** 20, 30, 40: $\underline{\hspace{2cm}}$ **b.** 17, 26, 35: $\underline{\hspace{2cm}}$ **c.** 4, 8, 12: $\underline{\hspace{2cm}}$ **d.** 11, 14, 17: $\underline{\hspace{2cm}}$ **e.** 25, 50, 75: $\underline{\hspace{2cm}}$ **f.** 7, 12, 17: $\underline{\hspace{2cm}}$ **READY CHECK***a problem like the one in today's lesson***7.** A pattern goes 11, 15, 19. What term comes just before 11?**A** 4**B** 7**C** 15**D** 23**CHECK YOURSELF**
☐ I can do this on my own
 ☐ I need a little help
 ☐ I have a question about # $\underline{\hspace{1cm}}$
