

Median and Outliers

1. Data: 21, 24, 3, 22, 25, 23, 20.

a. Outlier: _____

b. Median: _____

2. Prices: \$4, \$5, \$5, \$6, \$40. The mean is \$12. Which is a better typical price, the mean or the median? Why?

Better; why _____

3. An outlier affects the mean –

A less than the median

B more than the median

C not at all

D the same as the median

HOW DID IT GO? ☐ I got it ☐ Almost ☐ I need help

Comparing Distributions

1. Shop K: median 28 min, IQR 8. Shop L: median 36 min, IQR 8.

a. Faster typical delivery: _____ **b.** More consistent: _____

2. Data: 3, 5, 6, 8, 10, 12, 13. Find the median and the IQR.

Median; IQR _____

3. Set E: median 70, IQR 25. Set F: median 64, IQR 6. Which is true?

A E is higher and more consistent **B** F is higher and more consistent
C E is higher; F is more consistent **D** F is higher; E is more consistent
