UNIT 1 • STANDARD MPP.3

Math is Mine

Lesson 1-1 • Teacher Copy

Name: _____

Date: _____

Class: _____

My Notes

Level 1 Support

TODAY'S OBJECTIVES

Content Objective: I can describe the ways we are all doers of math, and compare my math story with a classmate's.

Language Objective: I can tell my math story using the words strength, challenge, and I use math when ____ .

See **Learn It** for the explanation and worked examples, and the **Vocab** tab for the words. These are your notes to fill in and keep.

Fill in each blank as we go. Use the Word Bank to help you.

WORD BANK — FILL EACH BLANK WITH THE BEST WORD

doer of math

Write About the Math

Guided ESOL writing

Use the support level you need. Every level answers the same math question.

1. Understand the Question

EXPLAIN

What do you believe are your math strengths, and which area do you most want to grow this year?

Your job: Answer the question. Use math evidence. Explain how the evidence proves your answer.

Responde la pregunta. Usa evidencia matemática. Explica cómo la evidencia demuestra tu respuesta.

2. Plan Your Math Words

Check at least two words you will use.

- ☐ **doer of math** — Anyone who uses mathematical thinking — which is everyone, every day.
persona que hace matemáticas — Cualquiera que use el pensamiento matemático, es decir, todos, todos los días.

- ☐ **math story** — Your own history with mathematics — what you have done, felt, and learned so far.
historia matemática — Tu propia historia con las matemáticas: lo que has hecho, sentido y aprendido.

- ☐ **strength** — Something you already do well and can share with others.
fortaleza — Algo que ya haces bien y puedes compartir con otros.

- ☐ **decompose** — To break a number into parts that add, subtract, multiply, or divide back to it.
descomponer — Separar un número en partes que se combinan para volver a formarlo.

- ☐ **estimate** — A reasoned answer that is close enough to be useful, without counting every one.
estimar — Una respuesta razonada, lo bastante cercana para ser útil, sin contar todo.

Say it first: Say your idea to a partner or quietly to yourself before you write.

Di tu idea a un compañero o en voz baja antes de escribir.

Name one math ____ you already have and one area you want to ____ .

Then name one thing you learned from a ____ 's math story.

Di tu respuesta primero: Mi respuesta es ____ porque ____.

3. Build Your Explanation

Model the parts: This model shows the parts of an explanation. It does not answer your writing question.

Claim: The book estimates about 80 riders by multiplying 20 cars by about 4 riders per car, without counting every person.

Evidence: A strong answer says the 4-riders-per-car is a reasoned guess, not a real count, so the total (about 80) is close enough to be useful. A weak answer just restates '80' with no reasoning about why it's an estimate.

Reasoning: This evidence connects the definition of doer of math to the mathematical claim.

Start

Most language support

Complete the frames. Use the word bank.

Completa las oraciones. Usa el banco de palabras.

- Name one math ____ you already have and one area you want to ____ . Then name one thing you learned from a ____ 's math story.

- My answer is ____.

Mi respuesta es ____.

Build

Some language support

Write two connected sentences. Use because, so, or but.

Escribe dos oraciones conectadas. Usa porque, entonces o pero.

- My claim is ____.

Mi afirmación es ____.

- I know because ____.

Lo sé porque ____.

- So ____.

Entonces ____.

Explain

Light language support

Write a claim, give math evidence, and explain your reasoning.

Escribe una afirmación, da evidencia matemática y explica tu razonamiento.

- **My claim is ____.**
Mi afirmación es ____.
 - **My math evidence is ____.**
Mi evidencia matemática es ____.
 - **This proves ____ because ____.**
Esto demuestra ____ porque ____.
-
-
-

4. Check Your Explanation

- ☐ I answered the question.
Respondí la pregunta.
- ☐ I used math evidence: numbers, an equation, a model, or a comparison.
Usé evidencia matemática: números, una ecuación, un modelo o una comparación.
- ☐ I explained how the evidence proves my answer.
Explicué cómo la evidencia demuestra mi respuesta.
- ☐ I used at least two math words.
Usé por lo menos dos palabras matemáticas.
- ☐ I reread complete sentences and punctuation.
Volví a leer mis oraciones completas y la puntuación.

Writing Guide — Teacher Copy

The support level changes the amount of language scaffolding, not the mathematical expectation. Look for the same five features in every response.

- I answered the question.
- I used math evidence: numbers, an equation, a model, or a comparison.
- I explained how the evidence proves my answer.
- I used at least two math words.
- I reread complete sentences and punctuation.

Answer Key & Teacher Guide

1. **Notes 1:** doer of math
2. **Notes 2:** math story
3. **Notes 3:** strength
4. **Notes 4:** decompose
5. **Notes 5:** estimate
6. **Watch for this mistake:** *Believing that 'doing math' only counts when it happens on paper in a classroom.*
7. **Try It 1:**
8. **Try It 2:** A. Because what you believe about yourself shapes how you learn all year — *The lesson's summary says it directly: what we believe about ourselves, about others, and about what we are learning shapes us.*
