UNIT 4 • STANDARD 6.AT.4

Find and Compare with Percentages

Lesson 4-4 • Teacher Copy

Name: _____

Date: _____

Class: _____

My Notes

Level 2 Standard

TODAY'S OBJECTIVES

Content Objective: I can find the percent of a number using an equation or a model.

Language Objective: I can explain my steps using the words percent, base, part, and equation.

See **Learn It** for the explanation and worked examples, and the **Vocab** tab for the words. These are your notes to fill in and keep.

Fill in each blank as we go. Use the Word Bank to help you.

WORD BANK — FILL EACH BLANK WITH THE BEST WORD

Percent of a Number

Equation

Discount

Tap any word to see what it means and a picture.

1 A part found by multiplying a number by a percent in decimal form is the

2 A number out of 100 is a .

3 The whole amount you start with, right after the word “of,” is the

4 The amount you get out of the whole is the .

5 A number sentence with an equal sign, like $\text{part} = \text{percent} \times \text{base}$, is an

6

An amount subtracted from a price is a .

Write About the Math

Guided ESOL writing

Use the support level you need. Every level answers the same math question.

1. Understand the Question

EXPLAIN

Who is correct, and how do you know?

Your job: Answer the question. Use math evidence. Explain how the evidence proves your answer.

Responde la pregunta. Usa evidencia matemática. Explica cómo la evidencia demuestra tu respuesta.

2. Plan Your Math Words

Check at least two words you will use.

- ☐ **Percent of a Number** — A part of a number found by multiplying the number by the percent written as a decimal.

Porcentaje de un número — Una parte de un número que se halla multiplicando el número por el porcentaje escrito como decimal.

- ☐ **Percent** — A way to compare a number to 100, shown with the % sign.

Porcentaje — Una manera de comparar un número con 100, con el signo %.

- ☐ **Base** — The whole amount you start with — the number right after the word “of.”

Base — La cantidad total con la que empiezas: el número que va después de la palabra “de”.

- ☐ **Part** — How much of the base (the whole) you get. It is your answer.

Parte — Cuánto obtienes de la base (el total). Es tu respuesta.

- ☐ **Equation** — A number sentence with an equal sign. The percent one is: $\text{part} = \text{percent} \times \text{base}$.

Ecuación — Una oración numérica con signo de igual. La de porcentaje es: $\text{parte} = \text{porcentaje} \times \text{base}$.

Say it first: Say your idea to a partner or quietly to yourself before you write.

Di tu idea a un compañero o en voz baja antes de escribir.

The ____ is correct because 12% of 1,500 = ____ $\times$ 1,500 = ____. The mistake was ____.

Di tu respuesta primero: Mi respuesta es ____ porque ____.

3. Build Your Explanation

Model the parts: This model shows the parts of an explanation. It does not answer your writing question.

Claim: The base is 60 — it comes right after 'of' — and the part is the discount, 25% of 60.

Evidence: Students identify 60 as the base, the 25% discount as the part to find, and connect 'of' to the base.

Reasoning: This evidence connects the definition of percent to the mathematical claim.

Start

Most language support

Complete the frames. Use the word bank.

Completa las oraciones. Usa el banco de palabras.

• The ____ is correct because 12% of 1,500 = ____ $\times$ 1,500 = ____ . The mistake was ____ .

• My answer is ____ .

Mi respuesta es ____ .

Build

Some language support

Write two connected sentences. Use because, so, or but.

Escribe dos oraciones conectadas. Usa porque, entonces o pero.

• My claim is ____ .

Mi afirmación es ____ .

• I know because ____ .

Lo sé porque ____ .

• So ____ .

Entonces ____ .

Explain

Light language support

Write a claim, give math evidence, and explain your reasoning.

Escribe una afirmación, da evidencia matemática y explica tu razonamiento.

- **My claim is ____.**

Mi afirmación es ____.

- **My math evidence is ____.**

Mi evidencia matemática es ____.

- **This proves ____ because ____.**

Esto demuestra ____ porque ____.

4. Check Your Explanation

☐

I answered the question.

Respondí la pregunta.

☐

I used math evidence: numbers, an equation, a model, or a comparison.

Usé evidencia matemática: números, una ecuación, un modelo o una comparación.

☐

I explained how the evidence proves my answer.

Explicué cómo la evidencia demuestra mi respuesta.

☐

I used at least two math words.

Usé por lo menos dos palabras matemáticas.

☐

I reread complete sentences and punctuation.

Volví a leer mis oraciones completas y la puntuación.

Writing Guide — Teacher Copy

The support level changes the amount of language scaffolding, not the mathematical expectation. Look for the same five features in every response.

- I answered the question.
- I used math evidence: numbers, an equation, a model, or a comparison.
- I explained how the evidence proves my answer.
- I used at least two math words.
- I reread complete sentences and punctuation.

Answer Key & Teacher Guide

1. **Notes 1:** Percent of a Number
2. **Notes 2:** Percent
3. **Notes 3:** Base
4. **Notes 4:** Part
5. **Notes 5:** Equation
6. **Notes 6:** Discount
7. **Watch for this mistake:** *A common mistake in Find the Percent of a Number is multiplying by the percent number itself instead of its decimal form — for example, finding 30% of 80 by computing $30 \times 80 = 2,400$ instead of $0.30 \times 80 = 24$. Always divide the percent by 100 to get the decimal, then multiply that decimal by the base.*
8. **Try It 1:** A. $9 - 15\% = 0.15$. Multiply: $0.15 \times 60 = 9$ bonus points.
9. **Try It 2:** A. $\$2 - 5\% = 0.05$. Multiply: $0.05 \times 40 = \$2$ in tax.
