

# Write and Evaluate Algebraic Expressions

Lesson 6-5

**Name:** Type your name

**Date:** Today's date

**Class:** Class period

---

## My Notes

Level 2 Standard

### TODAY'S OBJECTIVES

**Content Objective:** I can write an algebraic expression for a real situation and evaluate it for a given value of the variable.

**Language Objective:** I can explain my expression using the words variable, term, coefficient, constant, substitute, and evaluate.

See **Learn It** for the explanation and worked examples, and the **Vocab** tab for the words. These are your notes to fill in and keep.

Fill in each blank as we go. Use the Word Bank to help you.

### WORD BANK — FILL EACH BLANK WITH THE BEST WORD

Write Algebraic Expressions

Variable

Algebraic Expression

Coefficient

Constant

Like terms

Substitute

Evaluate

Tap any word to see what it means and a picture.

1

Turn the words into numbers, operations and a

2

A letter that stands for an unknown number is a

3

A math phrase with variables, numbers, and operations but no equal sign is an

4

The number multiplied by a variable, like the 7 in  $7n$ , is the

5

A term that is just a number and never changes, like the 5 in  $3x + 5$ , is a

6 Terms with the same variable part are  .

7 Replace the variable with a given number before you  
 the expression.

8 To put numbers in for the letters and work out the value is to  
 .

## Write About the Math

Guided ESOL writing

Use the support level you need. Every level answers the same math question.

### 1. Understand the Question

EXPLAIN

**Write an expression for the total cost. What does each part of the expression represent?**

**Your job:** Answer the question. Use math evidence. Explain how the evidence proves your answer.

*Responde la pregunta. Usa evidencia matemática. Explica cómo la evidencia demuestra tu respuesta.*

## 2. Plan Your Math Words

Check at least two words you will use.

- ☐ **Write Algebraic Expressions** — Translate words or a situation into numbers, variables, and operation symbols.

*Escribir expresiones algebraicas — Traducir palabras o una situación a números, variables y símbolos de operaciones.*

- ☐ **Variable** — A letter that stands for a number that is unknown or can change.

*Variable — Una letra que representa un número desconocido o que puede cambiar.*

- ☐ **Algebraic Expression** — A math phrase that has at least one letter.

*Expresión algebraica — Una frase matemática que tiene al menos una letra.*

- ☐ **Coefficient** — The number in front of a letter, like the 3 in  $3x$ .

*Coeficiente — El número frente a una letra, como el 3 en  $3x$ .*

- ☐ **Constant** — A fixed number in an expression or equation that does not change.

*Constante — Un número fijo en una expresión o ecuación que no cambia.*

**Say it first:** Say your idea to a partner or quietly to yourself before you write.

*Di tu idea a un compañero o en voz baja antes de escribir.*

**The total cost is \_\_\_\_ + \_\_\_\_h. The \_\_\_\_ represents the \_\_\_\_ and \_\_\_\_h represents the \_\_\_\_.**

*Di tu respuesta primero: Mi respuesta es \_\_\_\_ porque \_\_\_\_.*

### 3. Build Your Explanation

**Model the parts:** This model shows the parts of an explanation. It does not answer your writing question.

**Claim:** Write  $12t + 50$ : the  $12t$  grows with tickets, the 50 stays fixed.

**Evidence:** Students write  $12t + 50$ , identify  $t$  as the variable number of tickets, 12 as the coefficient (price per ticket), and 50 as the constant venue fee that does not change.

**Reasoning:** This evidence connects the definition of algebraic expression to the mathematical claim.

#### Start

Most language support

Complete the frames. Use the word bank.

*Completa las oraciones. Usa el banco de palabras.*

- The total cost is \_\_\_\_ + \_\_\_\_ h. The \_\_\_\_ represents the \_\_\_\_ and \_\_\_\_ h represents the \_\_\_\_.
- My answer is \_\_\_\_.

*Mi respuesta es \_\_\_\_.*

---

---

---

---

#### Build

Some language support

Write two connected sentences. Use because, so, or but.

*Escribe dos oraciones conectadas. Usa porque, entonces o pero.*

- My claim is \_\_\_\_.
- I know because \_\_\_\_.

*Mi afirmación es \_\_\_\_.*

*Lo sé porque \_\_\_\_.*

- So \_\_\_\_.

*Entonces \_\_\_\_.*

---

---

---

## Explain

### Light language support

Write a claim, give math evidence, and explain your reasoning.

*Escribe una afirmación, da evidencia matemática y explica tu razonamiento.*

- **My claim is \_\_\_\_.**  
*Mi afirmación es \_\_\_\_.*
- **My math evidence is \_\_\_\_.**  
*Mi evidencia matemática es \_\_\_\_.*
- **This proves \_\_\_\_ because \_\_\_\_.**  
*Esto demuestra \_\_\_\_ porque \_\_\_\_.*

---

---

---

---

---

## 4. Check Your Explanation

- ☐ I answered the question.  
*Respondí la pregunta.*
- ☐ I used math evidence: numbers, an equation, a model, or a comparison.  
*Usé evidencia matemática: números, una ecuación, un modelo o una comparación.*
- ☐ I explained how the evidence proves my answer.  
*Explicué cómo la evidencia demuestra mi respuesta.*
- ☐ I used at least two math words.  
*Usé por lo menos dos palabras matemáticas.*
- ☐ I reread complete sentences and punctuation.  
*Volví a leer mis oraciones completas y la puntuación.*
