UNIT 1 · STANDARD 5.OA.B.3

Math is Finding Patterns

Lesson 1-5 · Teacher Copy

Name: _____ **Date:** _____ **Class:** _____

My Notes

Level 1 Support

🎯 **TODAY'S OBJECTIVES**

Content Objective: I can find patterns and pattern rules, use them to make generalizations, and check my solutions with a table of values.

Language Objective: I can describe a pattern using the words pattern rule, generalization, and 'each number is ___ more than the one before it.'

📖 See **Learn It** for the explanation and worked examples, and the **Vocab** tab for the words. These are your notes to fill in and keep.

✏️ **Fill in each blank as we go. Use the Word Bank to help you.**

📚 **WORD BANK — FILL EACH BLANK WITH THE BEST WORD**

pattern | **pattern rule** | **generalization** | **table of values** | **reasonableness**

1 Something that repeats or changes in a predictable way is a _____.

2 The instruction for getting from one term to the next is the _____ _____.

3 A statement true for a whole pattern, not just the cases you tried, is a _____ .

4 A table listing each step of a pattern in order is a _____ _____ _____ .

5 Whether an answer makes sense, checked as you work, is its _____ .

Write About the Math

How can pattern rules tell you how many points each player has after the streak — and how can a table of values prove your answer is reasonable?
¿Cómo te pueden decir las reglas de patrón cuántos puntos tiene cada jugador después de la racha — y cómo puede una tabla de valores probar que tu respuesta es razonable?

Say your answer to a partner first. Then write it, using at least two of these words:

- ☐ **pattern** *patrón*
- ☐ **pattern rule** *regla del patrón*
- ☐ **generalization** *generalización*
- ☐ **table of values** *tabla de valores*
- ☐ **reasonableness** *sensatez del resultado*

Model: *The lesson distinguishes patterns that keep going (like coin value scaling) from one-time facts (like the jar's specific total).* — A strong answer explains a pattern applies to any number of coins (it generalizes), while a fact like $53.50 is fixed to this one jar. A weak answer just labels each card without explaining the difference.

Start

Complete the frames. Use the word bank.

Completa las oraciones. Usa el banco de palabras.

- **Player A's pattern rule leads to a final score of ___ points. Player B's pattern rule leads to a final score of ___ points. Creating a ___ of values that checks each step confirms both totals are correct.**
- **My answer is ___ because ___.**
  Mi respuesta es ___ porque ___.

Build

Write two connected sentences. Use because, so, or but.

Escribe dos oraciones conectadas. Usa porque, entonces o pero.

- **My claim is ___.**
  Mi afirmación es ___.
- **My evidence is ___, so ___.**
  Mi evidencia es ___, entonces ___.

Explain

Write a claim, give math evidence, and explain your reasoning.

Escribe una afirmación, da evidencia matemática y explica tu razonamiento.

- [ ] I answered the question.
- [ ] I used math evidence: numbers, an equation, or a model.
- [ ] I used at least two math words.

Writing Guide — Teacher Copy

- The answer to the math question is correct.
- The evidence is real lesson mathematics (numbers, equation, or model), not restated claim.
- The support level changed the language scaffolding, never the mathematical expectation.

Answer Key & Teacher Guide

1. **Notes 1:** pattern
2. **Notes 2:** pattern rule
3. **Notes 3:** generalization
4. **Notes 4:** table of values
5. **Notes 5:** reasonableness
6. **Watch for this mistake:** *Reporting only the points from the streak (20 or 30) and forgetting to add the points each player had before the streak began.*
7. **Try It 1:**

8. **Try It 2:**
