UNIT 2 · STANDARD 6.NOS.3

Add and Subtract Decimals

Lesson 2-11 · Teacher Copy

Name: _____ **Date:** _____ **Class:** _____

My Notes

Level 3 Enrichment

🎯 **TODAY'S OBJECTIVES**

Content Objective: I can add and subtract decimals by lining up the place values and the decimal points.

Language Objective: I can explain my steps using the words decimal, place value, tenths, hundredths, and add zeros.

📖 See **Learn It** for the explanation and worked examples, and the **Vocab** tab for the words. These are your notes to fill in and keep.

✏️ **Fill in each blank as we go. Use the Word Bank to help you.**

📚 **WORD BANK — FILL EACH BLANK WITH THE BEST WORD**

Decimal | **Place value** | **Tenths** | **Hundredths** | **Annex zeros**

Level 3: try the blanks from memory first, then check the bank.

1 A number that uses a point to show a value less than one whole is a _____.

2 The value a digit has based on its position in a number is its _____.

3 The first place to the right of the decimal point is the _____ place.

4 The second place to the right of the decimal point is the _____ place.

5 Writing extra zeros at the end of a decimal so the places line up is called _____ .

Write About the Math

How do you add decimals with different numbers of decimal places to find her total time?
¿Cómo sumas decimales con distinta cantidad de lugares decimales para hallar su tiempo total?

Say your answer to a partner first. Then write it, using at least two of these words:

- ☐ **Decimal** — *Decimal*
- ☐ **Place value** — *Valor posicional*
- ☐ **Tenths** — *Décimas*
- ☐ **Hundredths** — *Centésimas*
- ☐ **Annex zeros** — *Agregar ceros*

Model: *Lining up the decimal points keeps each place value matched.* — Students explain that aligning decimal points lines up matching place values (tenths under tenths, hundredths under hundredths) so the addition and subtraction are correct.

Start

Complete the frames. Use the word bank.

Completa las oraciones. Usa el banco de palabras.

- **The runner's total time is ___ minutes because 2.45 + 2.60 + 2.38 = ___.**
- **My answer is ___ because ___.**
  Mi respuesta es ___ porque ___.

Build

Write two connected sentences. Use because, so, or but.

Escribe dos oraciones conectadas. Usa porque, entonces o pero.

- **My claim is ___.**
  Mi afirmación es ___.
- **My evidence is ___, so ___.**
  Mi evidencia es ___, entonces ___.

Explain

Write a claim, give math evidence, and explain your reasoning.

Escribe una afirmación, da evidencia matemática y explica tu razonamiento.

- [ ] I answered the question.
- [ ] I used math evidence: numbers, an equation, or a model.
- [ ] I used at least two math words.

Writing Guide — Teacher Copy

- The answer to the math question is correct.
- The evidence is real lesson mathematics (numbers, equation, or model), not restated claim.
- The support level changed the language scaffolding, never the mathematical expectation.

Answer Key & Teacher Guide

1. **Notes 1:** Decimal
2. **Notes 2:** Place value
3. **Notes 3:** Tenths
4. **Notes 4:** Hundredths
5. **Notes 5:** Annex zeros
6. **Watch for this mistake:** *A common mistake in Add and Subtract Decimals is lining up the last digits (the right edges) of each number instead of lining up the decimal points — for example, adding 8.3 and 2.45 as if the 3 and the 5 belong in the same column. Before you add or subtract, add zeros so every number has the same number of decimal places (write 8.3 as 8.30), then check that the decimal points sit directly above one another.*
7. **Try It 1:** A. 4.85 — *Annex a zero so 9.6 becomes 9.60, then subtract: 9.60 − 4.75 = 4.85 units. Borrow in the hundredths and tenths places to subtract correctly.*
8. **Try It 2:** A. $16.73 — *Write 48.00 − 31.27 with points lined up. Hundredths: 0 − 7 → borrow → 10 − 7 = 3. Tenths: 9 − 2 = 7 (after borrowing). Ones: 7 − 1 = 6. Tens: 4 − 3 = 1. Answer: $16.73.*
